

Affiliate Manual

Getting Started

Welcome to the **Affiliate** documentation.

Here, you will find everything you need to set up your **Affiliate** service and create a vast promotional network, motivating your customers with enticing income potential.

You will be able to launch fully-featured affiliate programs for your store with this extension! There's no need to use third-party services and pay their requisit fees anymore. Drive more sales from alternative channels and let your affiliates earn additional money.

Go ahead, dive in!

Firstly, please find our extension in the [My Downloadable Products](#) section of our store. Learn [how to install extension](#), and proceed with [Quick Start](#), which will guide you in setting up your Affiliate service.

How to install the extension

Installation via composer (preferably)

We recommend this installation method because the composer automatically checks and installs necessary dependencies.

1. Back up your store's database and web directory.
2. Log in to the SSH console of your server and navigate to the root directory of the Magento 2 store.
3. Copy the installation instructions from the page [My Downloadable Products](#) to the SSH console and press ENTER.
4. Run the command `php -f bin/magento module:enable Mirasvit_Core Mirasvit_Affiliate` to enable the extension.
5. Run the command `php -f bin/magento setup:upgrade` to install the extension.
6. Run the command `php -f bin/magento cache:clean` to clean the cache.
7. Deploy static view files

```
rm -rf pub/static/*; rm -rf var/view_preprocessed/*; php -f bin/magento setup:static-content:deploy
```

Installation via direct file upload

You can also install the extension via direct files uploading.

1. Go to [My Downloadable Products](#) / **View & Download**.
2. Unpack the .zip package and copy the contents to the Magento root directory.
3. Log in to the SSH console of your server and navigate to the Magento root directory.
4. Run the command `php -f bin/magento module:enable Mirasvit_Core Mirasvit_Affiliate` to enable the extension.
5. Run the command `php -f bin/magento setup:upgrade` to install the extension.
6. Run the command `php -f bin/magento cache:clean` to clean the cache.
7. Deploy static view files

```
rm -rf pub/static/*; rm -rf var/view_preprocessed/*; php -f bin/magento setup:static-content:deploy
```

Install the extension for Hyva

1. Run the command to obtain the Blog MX Hyva component

```
composer require hyva-themes/magento2-mirasvit-affiliate
```

2. Enable the installed Hyva component:

```
bin/magento module:enable Hyva_MirasvitAffiliate
```

3. Update the Magento database schema and data with the command:

```
bin/magento setup:upgrade
```

4. Compile code to generate the contents of the Magento var/di folder:

```
bin/magento setup:di:compile
```

5. Run the command below to clean the cache:

```
bin/magento cache:flush
```

Quick Start

Our Affiliate extension comes with a set of pre-defined Programs and basic promotional materials for each customer that will join your promotional network, letting you begin building your Affiliate policy out-of-box.

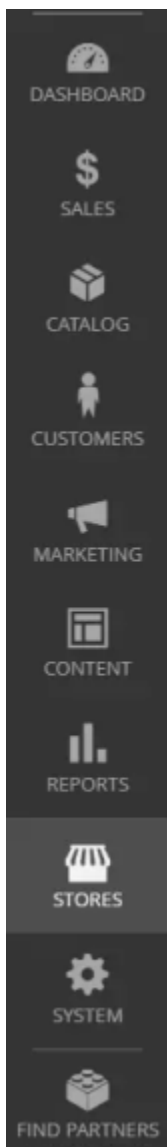

However, there's more you need to do to create and tune up for maximum flexibility and efficiency of your promotion.

1. Create a set of attractive [Banners](#), so your Affiliates can spread rich information about your goods and services.
2. Tune up, or even create new [Programs](#), which will turn commissions into a flexible, motivating engine.
3. Issue special [Coupons](#) for your Affiliates, so they can attract new customers with discounts.
4. Track all your [Transactions](#) and [Withdrawal Requests](#), analyze them, and tune them up for maximum efficiency at [Configuration Settings](#).
5. Create rich and informative [Email Notifications](#) for each action in your workflow to keep your Affiliates aware of their earnings and your staff of customers' requests.
6. Manage your [Affiliate Accounts](#) on a micro-level, building an effective promotional network.
7. Use our [Dashboard](#) to have all critical information available at your fingertips.

This should be a good place to start.

Refer to the appropriate sections of our manual to get more info.

Affiliate will receive commissions from referred customers during this period

Commissions limit
[global]

Maximum number of commissions from referred customer

Assign Priority
[global]

Assign to first referred affiliate

Option	Description
Add commission when the order has obtained status	Commission will be applied when order receives the selected status.
Subtract commission when the order has obtained status	Commission will be subtracted when order receives the selected status(es). Additional statuses for this and above option can be added at Stores -> Settings -> Order Status .
Subtract commission when credit memo is created	If the option is enabled, the commission will be subtracted after creating a credit memo.
Commission holding period (days)	Allows you to hold the commission transactions within the defined period.
Sales Commission Lifetime (days)	Affiliate will receive commissions from referred customers during this period. By default, commissions expire after 365 days (1 year).
Commissions limit	The limit is universal for all and applies to orders from individual referrals. For instance, there is an affiliate (A) and referrals (R1 and R2). If A has already received the number of commissions from R1's orders equal to the limit, they will no longer receive commissions from R1. However, they will continue to receive commissions from R2 until the same limit is reached.
Assign Priority	Assignment priority for commissions. There are two available options: Assign to first referred affiliate and Assign to last referred affiliate .

Withdrawal Workflow

Withdrawal Workflow

Minimum withdrawal amount [global]	<input type="text" value="50"/>
Automatic creation of a withdrawal request [global]	<input type="text" value="No"/> ▼
Payment Methods [global]	<div style="border: 1px solid gray; padding: 5px;"> <ul style="list-style-type: none"> PayPal Skrill Other </div>

Option	Description
Minimum withdrawal amount	Sets the affiliate minimum withdrawal amount.

Option	Description
Payment Methods	Allows you to turn on/off different services of money transfer to withdraw commissions. Currently supported services: PayPal , Skrill , Other (e. q. customer-defined).

Coupons

Coupons

Enable coupon <small>[global]</small>	<input type="text" value="Yes"/>
If enabled, affiliate can get coupon to refer friends	
Coupon pattern <small>[global]</small>	<input type="text" value="AFL-[A-Z]{4}"/>

Option	Description
Enable Coupon	Enables the possibility for affiliates to receive coupons for referring friends. This coupon will be displayed at Promotional Materials of Customer Account, and it's unique for each customer.
Coupon Pattern	If the option above is enabled, this option defines regular expression, how these coupons look like. By default, it is AFL-[A-Z]{4} (AFL-UYTR, for example). Read more about regular expressions here .

Account has been approved	Template for notification on affiliate account approval.
New Transaction	Template for notification on new affiliate transaction completion.
Balance has been updated	Template for notification on affiliate balance update.

For Admin

Option	Description
New Account	Template for admin notification on creating a new affiliate account.
New Withdrawal Request	Template for admin notification on the new withdrawal request

Note

Read more on email notification templates at [Email Notification Templates](#) section.

Affiliate Dashboard

The affiliate Dashboard is a starting point of our extension, which contains the statistical data of the currently defined affiliate policy results. It consists of two panels - **Main** and **Latest Activity**.

Main Dashboard Panel

Main Panel contains the Statistics Ribbon, which holds the following result markings:

- **Active Affiliates** - displays the number of customers who have joined your affiliate programs.
- **Visits** - quantity of visits that were made through promotional materials, such as [Banners](#), Referral Links and [Coupons](#).
- **Revenue** - income that your store has earned in total for the last seven days.
- **Commissions** - the amount of money that was earned by your affiliates.
- **Total Affiliates** - displays the total quantity of affiliates who have joined your programs.
- **Total Balance** - displays the total sum of commissions not withdrawn by affiliates.
- **Total Withdrawals** - displays the total sum of withdrawn commissions.
- **On hold** - displays the total amount of held commissions.

The score table of **Most Valuable Affiliates** is located under this ribbon, which displays the Affiliates that contributed to your store the most. It provides the following information per row:

- **Affiliate** - name of Affiliate customer.
- **Total Earning** - the total amount of commission, earned by an Affiliate
- **Clicks** - the total number of clicks received by promotional material of the Affiliate.

Note

The score position is based on the total earning amount, so if the customer has gotten many clicks but little income - it will be placed into a secondary position.

Latest Activity Panel

This panel is broken into individual cells, each representing a single [Transaction](#), with the most recent at the top. Each cell contains the following information:

- **Date of transaction** - Human-readable transaction date displayed at the right side in the bottom.
- **Customer** - a highlighted link to the account of a customer that triggered a transaction.
- **Order** - if the customer referred to order, its number will be highlighted and turned into a link.
- **Transaction summary** - a short description of the transactions.

- **Currency amount** -the amount of money earned or withdrawn with the current transaction.

This information is adequate to keep your Affiliate policy at your fingertips.

Managing Programs

Programs are the basic building blocks of your Affiliate policy. Each program represents a method, which customers can use to turn their investment in promotional activity into real money.

All currently defined programs are located at **Marketing -> Affiliate -> Programs**. There, they can be managed, activated, and removed.

The screenshot displays the Magento Admin interface for managing an affiliate program. The left sidebar shows a navigation menu with the following items: DASHBOARD, SALES, CATALOG, CUSTOMERS, MARKETING (highlighted), CONTENT, REPORTS, STORES, and SYSTEM. The main content area shows the configuration for a program named "Pay per Sale (40% discount)". At the top right of the main area, there are buttons for "Back", "Delete", and "Save and". Below the program name, there are sections for "General Information", "Conditions", "Coupon", and "Pay per Sale Commission". The footer of the page contains the text "Copyright © 2022 Magento Commerce Inc. All rights reserved." and a link to the "Privacy Policy".

Our extension comes with four basic programs that customers can join:

- **Pay per Impression** - used for banners that customers include to their pages, blogs, or even stores. The commission is generated per unique view of the banner.
- **Pay per Lead** - used for both referral links and other clickable promotional materials that can lead customers to your store. The commission is generated per each unique visit to the store made through a link or banner.
- **Pay per Click** - used for banners and other clickable materials. The commission is generated on a per-click basis.

- **Pay per Sale** - used for orders placed after visiting a store through a referral link or banner. The commission is generated as part of the actual sale.

Each of these basic programs can be modified and fitted to your vision of the Affiliate policy. Moreover, multiple programs of the same type can be active simultaneously, providing you with a highly flexible approach .

How to create a new Affiliate Program

Go to **Marketing -> Affiliate -> Programs** and press the **Add New** button. You will be brought to the creation page, which consists of the following several sections:

General Settings

General Information

Name *	<input type="text" value="Pay per Sale (40% discount)"/>
Description	<input type="text" value="use a coupon and buy any item from the Sale category with 40% discount"/>
Type *	<input type="text" value="Pay per Sale"/>
Store Views *	<div><p>All Store Views</p><p>Main Website</p><p>Main Website Store</p><p>Default Store View</p></div>
Is Active	<input checked="" type="checkbox"/> Yes
Active From	<input type="text" value="10/13/2022"/> 
Active To	<input type="text" value="10/13/2022"/> 
Is Visible	<input checked="" type="checkbox"/> Yes
Priority *	<input type="text" value="0"/>
Discard subsequent programs	<input type="checkbox"/> Yes

As the main part of the Program setup, this section is always visible, unlike others. It contains the following fields:

- **Name** - an intuitive name for the Program.
- **Description** - description of the Program.
- **Type** - type of Program (see above for details). Each type triggers the appearance of its own additional section with the following tiers:

- [Pay per Sale](#)
- [Pay per Lead](#)
- [Pay per Click](#)
- [Pay per Impression](#)
- **Store Views** - determines in which stores this program can be used.
- **Is Active** - determines whether this Program is active, and if customers can use it for generating commission.
- **Active From** - date from which the Program becomes eligible for generating commissions.
- **Active To** - date after which the Program stops generating commissions.
- **Is Visible** - determines whether the Program details will be displayed at the customer's account.
- **Priority** - the priority of the program (affects only **Pay per Sale** programs). If the orders match more than one program, the program with the highest priority will be used.

Each Affiliate Program allows you to configure commissions for each Affiliate Group created in the extension.

The tiers' definitions are determined in separate sections, which become visible only after the **Type** selection, and can differ depending on the particular Type.

Conditions

Conditions

Apply the commission only to cart items matching the following conditions (leave blank

If **ALL** of these conditions are **TRUE** :

Customer Group contains Retailer 

Store contains Default Store View 

Quantity in cart is 10 

Permits you to apply the commission only to cart items matching the following conditions:

Coupon

Coupon

Coupons Is Active Yes

Apply Cart Price Rule

Sale Category - 40% discount

Discount will be applied only for items specified in the rule products. Please note, you should use "Auto Generation" for your coupon rule.

This section allows you to choose one of the existing rules from your **Marketing -> Promotions -> Cart Price Rules** page. You can use configurable rules and offer discounts on specified products only.

- **Coupons Is Active** - determines whether new customers can use the coupon.
- **Apply Cart Price Rule** - determines which **Cart Price Rules** will be applied when customers purchase a new product. Discounts will only be applied for products specified in the rule. Please note that you need to use "Auto Generation" for your coupon rule.

Pay per Sale Commission

Pay per Sale Commission

Affiliate Group	Commission Type	Commission From First Order	From
Default (default)	Percent of order amount	2	1
Silver	Percent of order amount	3	2
Gold	Percent of order amount	5	3
Platinum	Percent of order amount	7	5
Blogger	Fixed amount	10	5
VIP	Fixed amount	15	10
+ Add Group			

Tiers of this type of program have the following parameters:

- **Affiliate Group** - affiliate group for which the commission is configuring.
- **Commission Type** - is a type of commission that the customer receives on order completion. There are three possible commission types:
 - **Percent of order amount** - the commission is calculated based on the amount of the heretofore paid order total.
 - **Percent of cart amount** - the commission is calculated from the subtotal of products bought, excluding taxes and/or shipping fees.
 - **Fixed amount** - the commission is a fixed monetary amount that drops to the customer account upon order completion.
- **Commission From First Order** - is a value representing either a percent (between 0 and 100), or a fixed monetary amount. This commission will be received only from the first order made by the customer related to the affiliate account.
- **Commission From Second and More Orders** - is a value representing either a percent (between 0 and 100), or a fixed monetary amount. This commission will be received from the second and higher orders made by the customer related to the affiliate account.

In addition, this parameter can optionally be limited by specifying a maximum number of transactions in the settings. This allows you to cap the number of sales eligible for commission, ensuring greater control over the payout structure for affiliates.

Pay per Lead Commission

Pay per Lead Commission

Affiliate Group	Commission Amount
Default (default) ▼	0.01
Silver ▼	0.02
Gold ▼	0.02
Platinum ▼	0.03
Blogger ▼	0.02

<input type="button" value="+ Add Group"/>		

Tiers of this type of program have the following parameter:

- **Affiliate Group** - affiliate group for which the commission is configuring.
- **Commission Amount** - fixed monetary amount which drops to the customer account when somebody views one of their promotional materials.

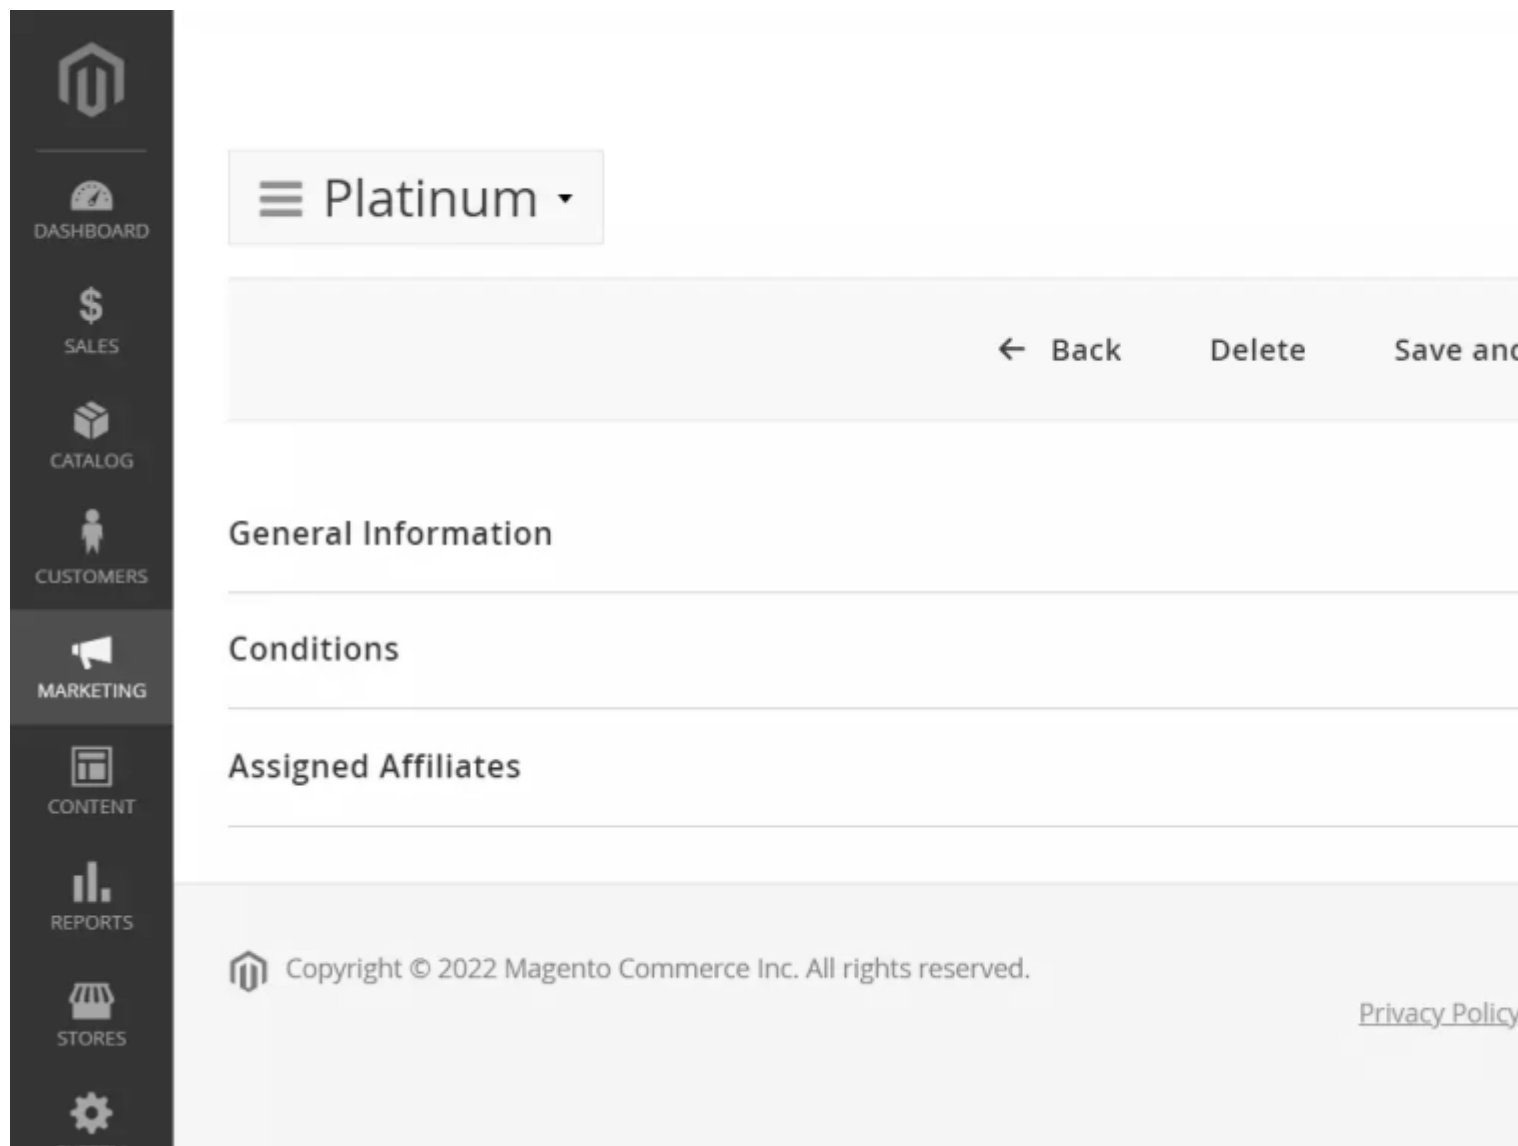

Managing Affiliate Groups

Affiliate Groups is a helpful tool that allows you to configure different commissions in Affiliate Programs for affiliates assigned to various groups.

Immediately following installation, the extension provides you with one default affiliate group to which all affiliates will be assigned.

Groups can be one of the following types: manual-updating or automatically-updating group. Automatically-updating groups are updating on cron basis.

How to create a new Affiliate Group

Go to **Marketing** -> **Affiliate** -> **Affiliate Groups** and press the **Add New** button. You will be brought to the creation page, which consists of several sections:

General Settings

General Information

Name *	<input type="text" value="Platinum"/>
Is Default	<input type="checkbox"/> No
Update Automatically	<input checked="" type="checkbox"/> Yes
Is Visible	<input checked="" type="checkbox"/> Yes
	<small>If disabled the group will not be visible for visitors</small>
Priority *	<input type="text" value="30"/>
Description	<input type="text" value="The group for affiliates which led customers with more than 250 orders total"/>
	<small>Describe the group (for displaying for visitors if the group is visible)</small>

As the main part of the Affiliate Group setup, this section is always visible, unlike others. It contains the following fields:

- **Name** - an intuitive name of the Affiliate Group.
- **Is Default** - the flag to set the group as default. Only one group can be named the default. Only the auto-updating group can be set as default. Conditions will be ignored if the group is set as default.
- **Update Automatically** - determines whether the group should or shouldn't be updated automatically by cron.
- **Is Hidden In Frontend** - determines whether this Affiliate group should or shouldn't be visible on the front of the website. If enabled - this Affiliate Group won't be displayed to visitors of the website.
- **Description** - the field to describe the Affiliate Group for visitors of the website.

Conditions

Conditions

Affiliate conditions (affects only automatically updated group)

If **ALL** of these conditions are **TRUE** :

Number of Orders from referred... equals or greater than 250 

Visible and affects only for auto-updating groups.

Here you can set rules based on which Affiliates will be assigned to this group. The extension provides the next rules:

- **Number of orders from referred customers** - the number of orders made by customers related to the affiliate account from which the Affiliate has already received commissions.
- **Sales Amount from referred customers** - the total amount of orders made by customers related to the affiliate account from which the Affiliate has already received commissions.

Assigned Affiliates

Assigned Affiliates 

Affiliates

Actions

20  per page

	ID	Name	Email
	14	Bridgette Ward	nasir.stoltenberg@example.com
	15	Dessie Auer	okonopelski@example.org

The table displays Affiliates assigned to the current Affiliate Group. This section provides you with the ability to add Affiliates to the Affiliate Group manually (allowed only for manual-updating Affiliate Groups)

Managing Accounts

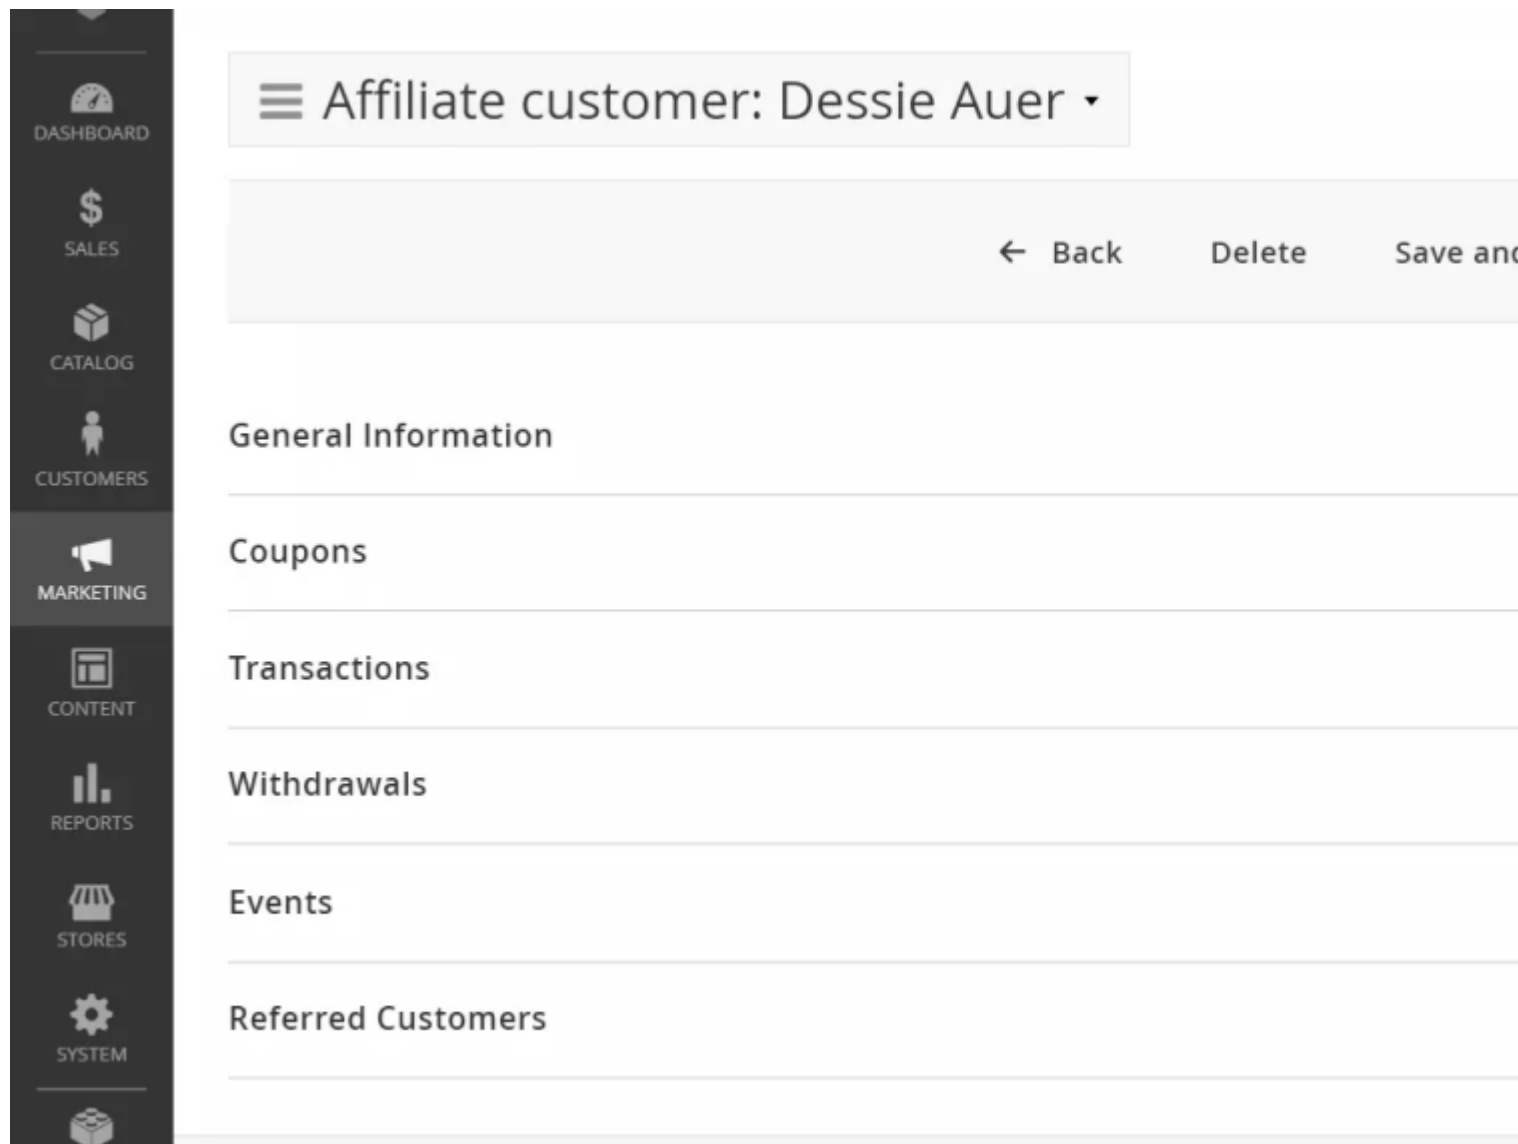

Each customer who has joined your Affiliate policy automatically created an account that provides a single place from which his or her progress and involvement can be tracked and viewed.

All of these accounts are located at **Marketing -> Affiliate -> Accounts**.

Note

You cannot remove a customer from your Affiliate program, but you can either exclude them from your Programs or revoke their approval, thus effectively cutting off their commissions flow.

Working with Affiliate Accounts

The screenshot shows a web application interface for managing affiliate accounts. On the left is a dark sidebar with navigation icons and labels: DASHBOARD, SALES, CATALOG, CUSTOMERS, MARKETING (highlighted), CONTENT, REPORTS, STORES, and SYSTEM. The main content area is light gray and features a header with a hamburger menu icon and the text 'Affiliate customer: Dessie Auer' with a dropdown arrow. Below the header are three action buttons: 'Back', 'Delete', and 'Save and'. The main content area is divided into several sections by horizontal lines: 'General Information', 'Coupons', 'Transactions', 'Withdrawals', 'Events', and 'Referred Customers'.

Each account managing page consists of four subsections:

- [General Information](#) - contains base profile of Affiliate.
- [Transactions](#) - contains a filtered grid, where all their transactions can be viewed
- [Withdrawals](#) - also contains a filtered grid, with all of their withdrawal requests.
- [Referred Customers](#) - list of customers who registered on your store using promotional materials of the current Affiliate.

Some of these subsections also contain additional information - follow the respective links above to read more.

General Information

General Information

Customer	Dessie Auer okonopelski@example.org								
Affiliate Group	Silver 								
Unique Identifier *	9bf31c7ff062936a96d3c8bd1f8f2ff3								
Status *	Approved

	All visible programs are assigned by default								
Statistic	<table><thead><tr><th>Clicks</th><th>Leads</th><th>Impression</th><th>Sales</th></tr></thead><tbody><tr><td>32</td><td>0</td><td>48</td><td>20</td></tr></tbody></table>	Clicks	Leads	Impression	Sales	32	0	48	20
Clicks	Leads	Impression	Sales						
32	0	48	20						

This section contains the Affiliate's profile, with the following fields:

- **Customer** - name and email of the Affiliate.
- **Affiliate Group** - The Affiliate Group to which the Affiliate is assigned. The Affiliate Group can be changed manually only to one of the manually-updating groups or the default group.
- **Unique Identifier** - UID has been generated automatically upon joining your Affiliate policy, and is used in Referral Links.

- **Status** - current status of Affiliate. There are the following possible states:
 - **Pending** - this is the statement that the Affiliate receives when they join your policy, but the settings option **Approval is required** is set to **Yes** (Read more about this [here](#))
 - **Approved** - the customer is a part of your Affiliate policy and is eligible to join your Programs.
 - **Not Approved** - the customer is cut off from your Affiliate policy, and stripped from your Programs. Use this option when you need to exclude a customer from your policy.
- **Referring Website** - the website on which the customer wishes to place your promotional materials. This field is added by default but could be disabled or removed at **Marketing -> Affiliate -> Additional Fields**.
- **Is Subscribed** - indicates whether the customer is subscribed to notifications of the Affiliate policy.
- **Payment Method** - is a method through which withdrawals are made. One of the methods should be selected as defined at the **Payment Methods** settings option (Read more on this [here](#))
- **Payment information** - determines additional info for payments.
- **Programs** - the checked list of programs to which the current Affiliate is plugged. Use this option if you wish to exclude the customer from one specific Program, but not from the Affiliate policy as a whole.

The General section may also contain additional Custom Fields. These fields could be added and configured at **Marketing -> Affiliate -> Additional Fields** (Read more about this [here](#))

This section also contains a **Statistics** table, from which can be seen promotional statistics of the current Affiliate:

- **Clicks** - the number of clicks made on their promotional materials.
- **Leads** - the number of leads to your store that were made by their promotional materials.
- **Impressions** - the number of views there were made on their promotional materials
- **Sales** - sales that were made using materials of this Affiliate (using a coupon, for example).

	90	Monty Wyman	georgiana.kassulke@example.com

This section is used for tracking how many referral customers of this Affiliate have made. The below statistics display their promotional chain:

- **Name** - name of the referred customer.
- **Email** - email of the referred customer.
- **Action** - last action made by the referred customer.

Note

In some cases, you may wish to include already registered customers in the promotional chain of the current Affiliate.

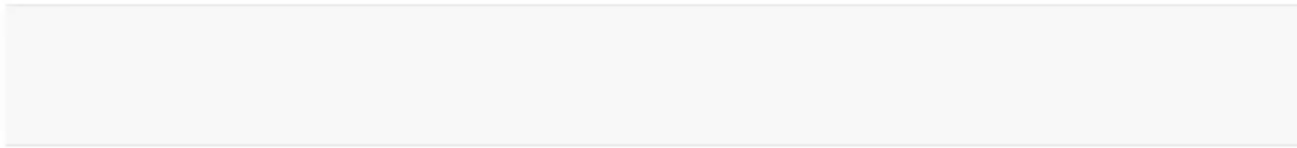

Press **Add Customers** to carry it out. A filtered grid of customers will appear on which you can select existing customers in bulk and add them using the **Add Selected Customers** button.

Issuing Banners

Banners are part of the Promotional Materials which a customer receives upon joining an Affiliate program.

A banner is a promotional graphical image which also acts as a referral link, linked with your store. Our extension records each click and view (impression) of a given banner and collects statistics.

5 ▾ per page

ID	Preview	Title	Type	Is Active	Statistic
3		Hot Deals	Image	Yes	<div style="border: 1px solid #ccc; padding: 2px;"> Clicks Impression </div>
2		4 tees for the price of 3	Image	Yes	<div style="border: 1px solid #ccc; padding: 2px;"> Clicks Impression </div>
1		Shop Pants - 20% OFF	Image	Yes	<div style="border: 1px solid #ccc; padding: 2px;"> Clicks Impression </div>

All banners are managed at the **Marketing -> Affiliates -> Banners** grid, which shows the following information:

- **Preview** - a small thumbnail on the banner image.
- **Title** - the title of the banner.
- **Type** - type of banner (read more [below](#)).
- **Statistics** - contains statistic markings of the current banner. Includes:
 - **Clicks** - the quantity of unique clicks on the image.
 - **Impressions** - unique views of the banner.

Banners are currently available to customers who marked **Yes** in the column **Is Active**. From the **Action** column, you can either edit or remove the banner.

How to Create New Banner

General Information

Name *	<input type="text" value="Hot Deals"/>
Type *	<input type="text" value="Image"/>
Store Views *	<div><p>All Store Views</p><p>Main Website</p><p>Main Website Store</p><p>Default Store View</p></div>
Is Active	<input checked="" type="checkbox"/> Yes

To create a new banner, press the **Add New** button, and you will be brought to the creation page. It consists of the following fields:

- **Name** - the name of the banner
- **Type** - the type of the banner. There are two available types, which are:
 - **Text** - the text link with promotional text.
 - **Image** - the regular image banner.
- **Is Active** - this determines whether this banner is active and available to Affiliates.

Depending on the **Type**, there can be two additional subsections, which are visible if the corresponding type is selected:

Text section

Text 

Link	<input type="text" value="https://affiliate.mirasvit.com/women/bottoms-women/pants-wom"/>
Text	<input type="text" value="Pants: hot-deals"/>

Contains additional fields for a text-based promotional banner:

- **Link** - the actual link that leads to your banner.
- **Text** -the promotional text that will accompany that link.

Image section

Banner 

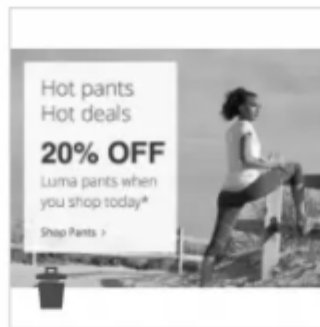

Link

<https://affiliate.mirasvit.com/women/bottoms-women/pants-wom>

Image

Upload

Allowed file types: jpeg, gif, png.

hot-deals.png
960x720, 528 KB

Width

480

Height

360

Contains additional fields for regular banner:

- **Link** - the actual link that leads to your banner.
- **Image** - a file uploading widgets, which allows you to upload a banner image of your choice. Only JPEG, GIF, and PNG images allowed.
- **Width** - the preferred width of the banner image (for inclusion to the banner code for the customer)
- **Height** - the preferred height of the banner image (for inclusion to the banner code for the customer)

Transactions

All transactions are located at **Marketing -> Affiliate -> Transactions**. Each action which is a part of the Affiliate programs will be recorded as a transaction, and not a single one can be removed. If for some reason

the balance of the Affiliate is incorrect, you will need to correct it with a [Manual Transaction](#).

<input type="checkbox"/>	ID ↑	Affiliate	Amount	Type	Description	Status
<input type="checkbox"/>	895	okonopelski@example.org	\$0.01	Commission	Click	Com
<input type="checkbox"/>	894	okonopelski@example.org	\$0.01	Commission	Click	Com
<input type="checkbox"/>	893	okonopelski@example.org	\$1.16	Commission	Commission for order #000000302 (\$58.00)	Com
<input type="checkbox"/>	892	nasir.stoltenberg@example.com	\$0.01	Commission	Click	Com

Transaction grid provides the following information:

- **Affiliate** - email of customer who has joined your Affiliate policy.
- **Amount** - money amount that was involved in the transaction. It can be both positive and negative.
- **Type** - type of transaction. There are two types available:
 - **Commission** - addition to the customer's balance.
 - **Withdrawal** - transfer from the customer's balance to the external payment system.
- **Description** - short description of the transaction.
- **Status** - status of the transaction. There can be one the following states of transactions present:
 - **On Hold** - can appear when the option **Commission holding period** is enabled (read more [here](#)).
 - **Completed** - the transaction is approved, and changes are applied to the balance.
- **Created At** - date of transaction.

How to make Manual Transactions

General Information 

Affiliate *	<input type="text" value="Demetris Predovic <affiliate@example.com>"/>
Amount *	<input type="text" value="10"/>
Message *	<input type="text" value="Affiliate transaction for you"/>

Go to **Marketing** -> **Affiliate** -> **Transactions** and press the **Add New** button. You will be brought to the transaction creation page, which contains just three fields:

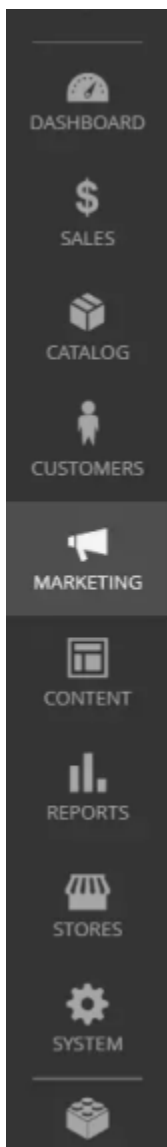

- **Affiliate** - drop-down list of customers who have joined your Affiliate policy. You can select only one per manual transaction.
- **Amount** - the amount of money that shall be distributed to the customer.
- **Message** - short transaction description.

Note

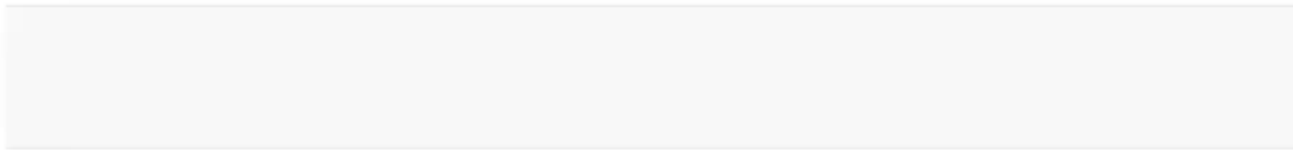

You can create manual transactions for both positive and negative currency amounts, though in either case, they will be marked as Commission.

Withdrawals

Withdrawals consist of money transfers from a customer's commission balance to some external payment system. Typically, customers request a withdrawal, but they can also be created manually (although the payment system still needs to be chosen by the customer).

☰ Withdrawals ▾

Filters

34 records found

5 per page

ID ↑	Affiliate	Amount	Fee	Request Date
34	ccrona@example.org	\$60.00	\$0.00	Oct 17, 2022 4:10:29 PM
33	cordell.crooks@example.org	\$60.00	\$0.00	Oct 17, 2022 3:50:23 PM
32	alfonso.johnston@example.com	\$60.00	\$0.00	Oct 17, 2022 3:40:44 PM
31	nasir.stoltenberg@example.com	\$50.00	\$0.00	Oct 4, 2022 10:38:21 PM
30	ryder.buckridge@example.org	\$50.00	\$0.00	Oct 4, 2022 10:33:40 PM

All withdrawal requests are located in their dedicated grid at **Marketing -> Affiliate -> Withdrawals**, where they are arranged in a grid with the following information:

- **Affiliate** - email of the customer who has joined your Affiliate policy.
- **Amount** - money amount that the customer wishes to transfer to an external payment system.
- **Fee** - surcharge that shall be paid additionally for transfer.
- **Request date** - date on which the customer made a withdrawal request.
- **Type** - current status of the withdrawal. Read more on these statuses below.

How to create manual Withdrawal Request

General Information

Affiliate *	<input type="text" value="Katherine Spencer <nels.cole@example.net>"/>
Status *	<input type="text" value="Pending"/>
Amount *	<input type="text" value="30"/>
Fee *	<input type="text" value="0"/>

Go to **Marketing -> Affiliate -> Withdrawals**, and press the **Add New** button. You will be brought to request a creation page with the following fields:

- **Affiliate** - a customer that needs to withdraw funds. Only one customer can be selected per request.
- **Status** - status of request. There are four possible states of withdrawals:
 - **Pending** - this status is assigned automatically to each new withdrawal.
 - **Approved** - this status should be set when customers are allowed to chose a payment method and make a transfer.
 - **Denied** - this status is assigned when for some reason, withdrawal is forbidden.
 - **Completed** - this status is assigned automatically when the transfer is made.
- **Amount** - amount of money that should be transferred.
- **Fee** - surcharge that should be paid additionally.

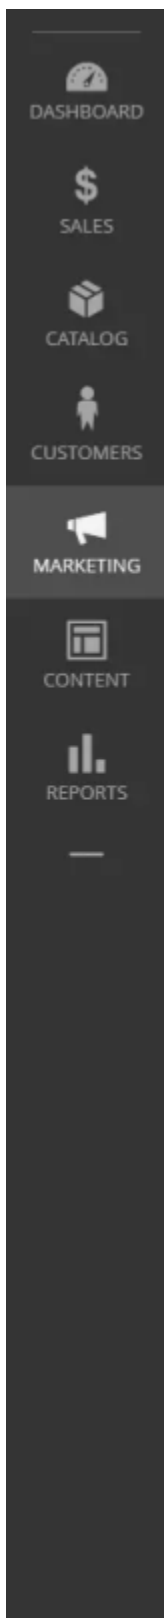

Email Notification Templates

Our extension encourages the sending of email notifications on each key action that an affiliate can perform. You can see their list on [Email Notification Settings](#) subsection at **Marketing -> Affiliates -> Settings**.

Each notification can be sent using its template. It is a standard Magento Transactional Email that can be [customized](#) using the default Magento means.

Our extension also adds a set of special [variables](#) to the templates that turn emails into flexible notifications.

How to customize Email Notification

New Template

← Back Reset Convert to Plain Text Preview Temp

Load Default Template

Template *

Load Template

Template Information

Currently Used For Stores -> Configuration -> Customer Configuration -> Create New Account Options -> Default Welcome Email (Default Config)

..

Template Subject * {{trans "Welcome to %store_name" store_name=\$store.frontend_n.

Insert Variable...

Template Content *

```

{{template config_path="design/email/header_template"}}
<p class="greeting">{{trans "%name," name=$customer.name}}
</p>
<p>{{trans "Welcome to %store_name."
store_name=$store.frontend_name}}</p>
<p>
  {{trans
    'To sign in to our site, use these credentials during checkout
  
```

Template Styles

If you wish to customize one of the Affiliate Email Notification, please do the following:

- Go to **Marketing -> Email Templates** and press the **Add New Template** button. You will be brought to the Template creation page.
- Use the **Template** drop-down field to select one of the default Affiliate templates as a base - they are located under the `Mirasvit_Affiliate` section.

Note

If you wish to customize the notification for a new account creation - you will realize that our extension

provides two different templates with the same name - **New Account**. The first one is the email notification for admin staff and the second is for the affiliate.

- Press the **Load Template** button to automatically fill in the **Template Subject** and the **Template Content** fields with default content. Modify them to fit your needs.
- Give the template a new **Template Name** and save the template. From this moment on, it becomes selectable in the configuration section.
- Go to **Marketing -> Affiliates -> Settings -> Email Notification Settings**, pick up the proper event, assign it to your newlycreated template, and save the configuration.

Notification Email Variables

Our extension also provides customers with a list of special variables which can be used for email customizing.

Here is the list of the most used variables (some of them, however, can be used only in specific notifications):

- `{{var account.getName()}}` - name of the current Affiliate
- `{{var account.getEmail()}}` - email of the current Affiliate
- `{{var account.getPaymentEmail()}}` - emails on financial returns, used by the Affiliate for payments.
- `{{var account.getWebsite()}}` - referring website of the current Affiliate
- `{{var account.getBalance()}}` - balance of the current Affiliate. Shortcut `{{var balance}}` can also be used.
- `{{var account.getTotalCommissions()}}` - total quantity of all commissions, received by the Affiliate.
- `{{var account.getTotalWithdrawals()}}` - total quantity of all withdrawals, made by the Affiliate.
- `{{var account.getIsSubscribed()}}` - returns true or false, with the question of whether the account has a subscription.
- `{{var status}}` - shortcut for account status of current Affiliate (available only in notifications for New Account)
- `{{var isPending}}` - shortcut, which returns true or false, depending on a Pending status of the Affiliate account. Typically used in `{{if isPending}}` conditionals and available only in the notifications for New Account.
- `{var transaction.getAmount() }` - amount of the current Affiliate transaction. Shortcut `{{var amount}}` also can be used.
- `{var transaction.getMessage() }` - message which contains details of the transaction (commission or withdraw).
- `{{var withdraw.getAmount()}}` - amount of current withdrawal action, requested by the Affiliate
- `{{var withdraw.getMessage()}}` - message which contains details of Withdrawals requested by Affiliate

Example

You can also use variables in some complex expressions, using a special `{{trans}}` variable, which is equal to the `sprintf` function, and allows PHP-like expressions:

```
{{trans "Greetings, %name," name=$account.getName()}}
```

Account Additional Fields

Account additional field settings located at **Marketing -> Affiliate -> Additional Fields**.

☰ Account Additional Fields ▾

Key *	Label *	Field Type
 <input type="text" value="website"/> Use letters, numbers or underscore	<input type="text" value="Referring Website"/>	<input type="text" value="Text"/>
 <input type="text" value="legal_age"/> Use letters, numbers or underscore	<input type="text" value="I am of legal age and have read the"/>	<input type="text" value="Checkbox"/>
 <input type="text" value="chboxes"/> Use letters, numbers or underscore	<input type="text" value="How did you find out about our aff"/>	<input type="text" value="Checkbox Group"/>

This page contains a list of additional account fields, which could be added, changed, or removed. These fields are used on the **Sign In to Affiliates** and **Affiliate Account Settings** pages.

Each field record has the next parameters:

- **Key** - index of the name of the additional field. It is submitted with the form as part of a name/value pair.
- **Label** - caption for the field.

- **Field Type** - a type of form control:
 - **Text** - an input field where the user can enter text data.
 - **Textarea** - a multi-line text input control.
 - **Checkbox** - a checkbox allowing single values to be selected/deselected.
 - **Checkbox Group** - checkboxes, allowing several values to be selected from provided options.
 - **Radio Button Group** - radio buttons, let a user select only one from provided options.
 - **Select** - a drop-down menu of options.
- **Enabled** - sets whether the field will be used for Account settings.
- **Required** - sets whether a user must specify a value for the field before the form can be submitted.
- **Field Placeholder** - placeholder text for the field with the "Text" or "Textarea" field type.
- **Options** - list of options for the field with the "Checkbox Group", "Radio Button Group", or "Textarea" field type.
 - **Option Key** - represents the option value to be submitted with the form.
 - **Option Label** - caption for the option.

Migration from Magento 1 to Magento 2

Below are examples of scripts that can be used to transfer data from a Mirasvit Affiliate for Magento 1 to a Mirasvit Affiliate for Magento 2.

To use scripts, you will need the help of a PHP developer. Scripts may contain bugs and not transfer all necessary data, meaning that you may need to adjust them for your needs.

Migration service is not a part of our support service.

Click on the names of scripts below to download:

- [mirasvit_affiliate_m1_export.php](#) - script for exporting Magestore Affiliate data to XML file.
- [mirasvit_affiliate_m2_import.php](#) - script for importing Affiliate data from XML file.

How to perform Migration

Follow these steps to perform the migration correctly:

1. Run standard Magento 2 migration, and make sure that customers and orders have been transferred from your M1 store to M2;
2. Make sure that the Affiliate for Magento 2 is [installed](#) on your M2 store.
3. Place `mirasvit_affiliate_m1_export.php` to the root of your M1 store, and run it either:
 - From the browser by opening the URL `http://store_m1.com/mirasvit_affiliate_m1_export.php`, or
 - From the SSH/Console: navigate to your store's root and run the command `php -f mirasvit_affiliate_m1_export.php`
4. If the script returns success, the file `affiliate_export.xml` will be created at the root of the store with all of your data. Transfer it to the root of your M2 store;
5. Place `mirasvit_affiliate_m2_import.php` to the root of your M2 store, and run it either:
 - From the browser by opening the URL `http://store_m1.com/mirasvit_affiliate_m2_import.php`, or
 - From the SSH/Console: navigate to your store's root and run the command `php -f mirasvit_affiliate_m2_import.php`
6. Check migrated data.

7. When the migration is completed, **remove both migration scripts.**

Troubleshooting

In some cases, the import script can crash on timeout or a memory overloading error (due to large quantities of data). In this case, you should restart the import script by reloading the browser page. It will skip previously uploaded data, and proceed from the last unprocessed record.

How-To

Contents

- [How can I translate affiliate into different languages?](#)

How can I translate an affiliate into different languages

The extension uses the same logic for translations as default Magento. More details: <https://devdocs.magento.com/guides/v2.3/frontend-dev-guide/translations/xlate.html>

Our i18n files should be located at: `vendor/mirasvit/module-affiliate/src/Affiliate/i18n/`

Create a separate file for your language (`en_US.csv`, `de_DE.csv`). The names for all languages can be found via this command:

```
php -f bin/magento info:language:list
```

Override the strings in your dictionary file:

```
"Original line" , "Translated line"
```

Run this command to see the changes:

```
php -f bin/magento setup:static-content:deploy
```

```
php -f bin/magento cache:flush
```

The custom themes will be displayed instead of the default for your language.

How to upgrade the extension

To upgrade the extension, follow these steps:

1. Back up your store's database and web directory.
2. Log in to the SSH console of your server and navigate to the root directory of the Magento 2 store.
If the extension was installed via:

- **Composer:** run the command `composer require mirasvit/module-affiliate:* --update-with-dependencies` to update the current extension with all dependencies.

Note

If you have the Hyva installed, run:

```
composer require mirasvit/module-affiliate:* hyva-themes/magento2-mira.
```

Note

In some cases, the above command is not applicable, or you cannot upgrade just the current module and need to upgrade all the Mirasvit modules in a bundle. In this case, the above command will have no effect.

Instead, run the `composer update mirasvit/*` command. It will update all the Mirasvit modules installed in your store.

- **Direct file upload:** download the new extension package from our store and copy contents to the root Magento directory
3. Run the command `php -f bin/magento module:enable Mirasvit_Core Mirasvit_Affiliate` to re-enable the extension.

Note

If you have the Hyva installed, run:

```
bin/magento module:enable Mirasvit_Core Mirasvit_Affiliate Hyva_Miras
```

4. Run the command `php -f bin/magento setup:upgrade` to install updates.
5. Run the command `php -f bin/magento cache:clean` to clean the cache.
6. Deploy static view files

```
rm -rf pub/static/*; rm -rf var/view_preprocessed/*; php -f bin/magento setup:static-content:deploy
```

Disabling the Extension

Temporarily Disable

To temporarily disable the extension, please take the following steps:

1. Log in to the SSH console of your server and navigate to the root directory of the Magento 2 store.
2. Run the command `php -f bin/magento module:disable Mirasvit_Affiliate` to disable the extension.

Note

If you have the Hyva installed, run:

```
bin/magento module:disable Mirasvit_Affiliate Hyva_MirasvitAffiliate
```

3. Log in to the Magento backend and refresh the store cache (if enabled).

Extension Removing

To uninstall the extension, please take the following steps:

1. Log in to the SSH console of your server and navigate to the root directory of the Magento 2 store.
2. Run the command `composer remove mirasvit/module-affiliate` to remove the extension.

Note

If you have the Hyva installed, run:

```
composer remove mirasvit/module-affiliate hyva-themes/magento2-m
```

3. Log in to the Magento backend and refresh the store cache (if enabled).

Change Log

1.5.7

(2025-01-22)

Fixed

- Optimized query to retrieve bestseller IDs in the "Referral Widget"
-

1.5.6

(2024-12-04)

Improvements

- Clarification for empty commissions
-

1.5.5

(2024-11-15)

Fixed

- Fixed the issue with the customer-affiliate relation not being acquired
 - Fixed the issue with error when registering a customer in affiliate program from the admin panel
-

1.5.4

(2024-08-06)

Fixed

- Unexpected logout
-

1.5.3

(2024-07-12)

Fixed

- Issue with filter by type in the withdrawal grid
-

1.5.2

(2024-06-17)

Fixed

- Fixed the issue with role permissions for Account Additional Fields settings
-

1.5.1

(2024-06-17)

Fixed

- Fixed the issue with blank pages when AdGuard Chrome extension installed
-

1.5.0

(2024-06-11)

Features

- Ability to manage account additional fields
-

1.4.37

(2024-05-27)

Fixed

- Bestsellers in widget
-

1.4.36

(2024-05-20)

Fixed

- Issue saving configuration in Magento 2.4.1 and below
-

1.4.35

(2024-05-09)

Improvements

- Support Mirasvit GDPR extension v1.4
-

1.4.34

(2024-04-24)

Improvements

- Ability to add custom Payment Methods
-

1.4.33

(2024-03-05)

Fixed

- Preventing error output when requesting a non-existent banner
-
