Mirasvit Backend Search Manual

Getting Started

Welcome to the **Backend Search** documentation.

Whether you are a new or an advanced user, you can find some useful information here.

Go ahead, dive in!

Firstly, please, find our extension in [My Downloadable Products](#) section of our store. Learn [how to install extension](#), and proceed with Quick Start, which will guide you to set up your **Backend Search** service.

How to install the extension

How to install the extension using composer

1. Backup your store's database and web directory.
2. Login to the SSH console on your server and navigate to the root directory of the Magento 2 store.
3. Copy the installation instructions from the page [My Downloadable Products](#) to the SSH console and press ENTER.
4. Run command `php -f bin/magento module:enable Mirasvit_Core Mirasvit_BackendSearch` to enable the extension.
5. Run command `php -f bin/magento setup:upgrade` to install the extension.
6. Run command `php -f bin/magento cache:clean` to clean the cache.

7. Deploy static view files

   ```
   rm -rf pub/static/*; rm -rf var/view_preprocessed/*; php -f
   bin/magento setup:static-content:deploy
   ```

8. Run command `php -f bin/magento indexer:reindex` to reindex data.

How to install the extension manually

1. Backup your store's database and web directory.
2. Download archive from [My Downloadable Products](#).
3. Unzip the extension locally.
4. Copy unzipped folder to the root directory of the Magento store.
5. Run command `php -f bin/magento module:enable Mirasvit_Core Mirasvit_BackendSearch` to enable the extension.
6. Run command `php -f bin/magento setup:upgrade` to install the extension.
7. Run command `php -f bin/magento cache:clean` to clean the cache.

8. Deploy static view files

```
rm -rf pub/static/*; rm -rf var/view_preprocessed/*; php -f
bin/magento setup:static-content:deploy
```

How to upgrade extension

To upgrade the extension, follow these steps:

1. Backup your store's database and web directory.
2. Login to the SSH console of your server and navigate to the root directory of the Magento 2 store.
3. Run command `composer require mirasvit/module-assistant:* --update-with-dependencies` to update current extension with all dependencies.

   Note

   In some cases, the command above is not applicable, or it's not possible to update just the current module, or you need to upgrade all Mirasvit modules in a bundle. In this case, the command above will have no effect.

   Run instead `composer update mirasvit/*` command. It will update all Mirasvit modules installed in your store.

4. Run command `php -f bin/magento setup:upgrade` to install updates.
5. Run command `php -f bin/magento cache:clean` to clean the cache.

6. Deploy static view files

```
rm -rf pub/static/*; rm -rf var/view_preprocessed/*; php -f
bin/magento setup:static-content:deploy
```

Disabling the Extension

Temporarily Disable

To temporarily disable the extension please follow these steps:

1. Login to the SSH console on your server and navigate to the root directory of the Magento 2 store.
2. Run the command `php -f bin/magento module:disable Mirasvit_BackendSearch` to disable the extension.
3. Log in to the Magento backend and refresh the store cache (if enabled).

Extension Removal

To uninstall the extension, please follow these steps:

1. Login to the SSH console on your server and navigate to the root directory of the Magento 2 store.
2. Run command `php -f bin/magento module:disable Mirasvit_BackendSearch` to disable the extension.
3. Run command `composer remove mirasvit/module-assistant` to remove the extension.
4. Log in to the Magento backend and refresh the store cache (if enabled).

Change Log

0.1.0

(2025-06-16)

Improvements

- Translations support.
- WCAG 2.2 AA compliance.

0.0.23

(2025-04-22)

Fixed

- Amasty ElasticSearch compatibility

0.0.22

(2025-04-14)

Fixed

- Amasty Elasticsearch 2.x compatibility

0.0.21

(2025-01-10)

Features

- Customer and order-related mview subscriptions for changes tracking

---

0.0.20

(2024-12-11)

Fixed

- Amasty Elasticsearch engine compatibility

0.0.19

(2024-11-22)

Fixed

- Product search adjustments for Magento EE

0.0.18

(2024-10-28)

Fixed

- Exclude pagebuilder tags from description
- Menu permission issues

0.0.17

(2024-10-04)

Fixed

- Issue with response total value fetch

0.0.16

(2024-09-19)

Improvements

- Use selection to search. Once you select any text on the page and open the search using keyboard shortcuts ("/" or "Cmd+F"), the extension automatically places the selected text into the search input and performs the search.
