

Mirasvit Blog MX Manual

Getting Started

Welcome to the documentation of [Blog MX for Magento 2](#) extension.

Whether you are a new or an advanced user, you can find some useful information here.

First of all we recommend you check the following link:

- [How to install extension](#)

How to install the extension

1. Backup your store's database and web directory.
2. Login to your server's SSH console and navigate to the root directory of the Magento 2 store.
3. Copy the installation instructions from the page [My Downloadable Products](#) to the SSH console and press ENTER.
4. Run command `php -f bin/magento module:enable Mirasvit_Core Mirasvit_BlogMx` to enable the extension.
5. Run command `php -f bin/magento setup:upgrade` to install the extension.
6. Run command `php -f bin/magento cache:clean` to clean the cache.
7. Deploy static view files

```
rm -rf pub/static/*; rm -rf var/view_preprocessed/*; php -f bin/magento setup:static-content:deploy
```

How to upgrade extension

To upgrade the extension, follow these steps:

1. Backup your store's database and web directory.
2. Login to your server's SSH console and navigate to the root directory of the Magento 2 store.
3. Run command `composer require mirasvit/module-blog-mx:* --update-with-dependencies` to update current extension with all dependencies.

Note

There are some cases when the command above is not applicable; it is not possible when updating the current module; neither will it be applicable when upgrading all the Mirasvit modules in a bundle. In this case, the command above will be of no effect.

Run instead `composer update mirasvit/*` command. It will update all Mirasvit modules installed in your store.

4. Run command `php -f bin/magento module:enable Mirasvit_Core Mirasvit_BLogMx` to enable the extension.

5. Run command `php -f bin/magento setup:upgrade` to install updates.

6. Run command `php -f bin/magento cache:clean` to clean the cache.

7.

Deploy static view files

```
rm -rf pub/static/*; rm -rf var/view_preprocessed/*; php -f bin/magento setup:static-content:deploy
```

Disabling the Extension

Temporarily Disable

To temporarily disable the extension please follow these steps:

1. Login to your server's SSH console and navigate to the root directory of the Magento 2 store.
2. Run command `php -f bin/magento module:disable Mirasvit_BlogMx` to disable the extension.
3. Log in to the Magento backend and refresh the store cache (if enabled).

Removing the Extension

To uninstall the extension, please follow these steps:

1. Login to your server's SSH console and navigate to the root directory of the Magento 2 store.
2. Run the command `composer remove mirasvit/module-blog-mx` to remove the extension.
3. Log in to the Magento backend and refresh the store's cache (if enabled).
