

# Mirasvit Comments Manual

## Welcome to the Comments Extension Guide!

Here you will find everything you need to set up and use Comments.

This extension, once enabled, automatically integrates with the **Mirasvit Advanced Reviews** and **Mirasvit Blog MX** extensions.

## General Configurations

All configurations of the **Comments** extension are located at **Stores -> Configuration -> Mirasvit Extensions -> Comments**.

The extension has only one configurations section - **General Settings** - with the following configurations:

- **Enable Comments** - enable/disable the comments feature.
- **Allow Guests to Write Comments** - defines whether guest users are allowed to leave comments or not.
- **Automatically Approve Comments** - defines whether comments left by visitors should automatically obtain the **Approved** status or should be left for moderation.
- **Date Format** - defines how the date when the comment was left should be displayed.
- **Enable Admin Notifications** - if enabled, the extension will add notifications about pending comments into the admin system notifications.

## General Configurations

All configurations of the **Comments** extension are located at **Stores -> Configuration -> Mirasvit Extensions -> Comments**.

The extension has only one configurations section - **General Settings** - with the following configurations:

- **Enable Comments** - enable/disable the comments feature.
- **Allow Guests to Write Comments** - defines whether guest users are allowed to leave comments or not.
- **Automatically Approve Comments** - defines whether comments left by visitors should automatically obtain the **Approved** status or should be left for moderation.
- **Date Format** - defines how the date when the comment was left should be displayed.
- **Enable Admin Notifications** - if enabled, the extension will add notifications about pending comments into the admin system notifications.

## Change Log

## 1.1.1

(2026-05-06)

### Features

- **Bulk status management for comments** — the Comments grid now has a Status column with a dropdown filter, plus a "Change status" bulk action (Approved / Pending / Rejected) so moderators can approve or reject multiple comments at once without opening each one individually.
- **Product and Review/Post context columns in the Comments grid** — each row now shows which product a comment belongs to (linked to the storefront product page, opens in a new tab) and the review or blog-post title (linked to the admin edit page), giving moderators full context without clicking through to each comment.
- **Comments accessible from the Review module's page navigation** — the dropdown menu on the All Reviews, Pending Reviews, and Review Reminders pages now includes a "Comments" link. The same navigation also appears on the Comments page itself, making it easy to switch between reviews and comments without going back through the sidebar.

### Fixed

- Submitting a comment with missing required fields now shows a clear error message instead of silently failing.
  - The Review link in the Comments grid was non-functional — clicking it reloaded the current page instead of opening the review edit page.
  - Small improvements and fixes.
- 

## 1.1.0

(2026-04-20)

### Features

- **Admin UI localization** — the admin interface is now translated into 15 languages: Arabic, Czech, German, Spanish, French, Italian, Japanese, Dutch, Polish, Brazilian Portuguese, Portuguese, Swedish, Turkish, Ukrainian, and Chinese.
- 

## 1.0.8

(2026-03-02)

### Fixed

- Fixed an error that prevented the Comments page in the admin panel from loading.
  - Small improvements and fixes.
- 

## 1.0.7
