

Layered Navigation Manual

Welcome to the Layered Navigation User Manual

Layered Navigation is a powerful yet simple extension, which allows you to build your own layered menu, making catalog navigation and filtering more convenient.

It replaces the standard Magento layered navigation widget, displayed on each category page, with a more complex one - allowing customers to dynamically combine filters and browse desired products more quickly.

Go ahead, dive in!

Firstly, please find our extension in the [My Downloadable Products](#) section of our store. Learn [how to install extension](#).

Proceed then with [Quick Start](#), which will guide you to build your very own custom layered navigation menu.

How to install the extension

Prepare for installation

1. Back up your store's database and web directory.
2. Log in to the SSH console of your server and navigate to the root directory of the Magento 2 store.
3. Copy the installation instructions from the page [My Downloadable Products](#) to the SSH console and press ENTER.

Install the extension via composer

1. Run the command below to enable the extension:

```
php -f bin/magento module:enable Mirasvit_Core Mirasvit_SeoFilter Mirasvit_LayeredNavigation
```

Note

If you are using Magento LiveSearch, additionally run:

```
php -f bin/magento module:enable Mirasvit_LayeredNavigationLiveSearch
```

2. Run the command below to install the extension:

```
php -f bin/magento setup:upgrade
```

3. Run the command below to clean the cache:

```
php -f bin/magento cache:clean
```

4. Deploy the static view files

```
rm -rf pub/static/*; rm -rf var/view_preprocessed/*;  
php -f bin/magento setup:static-content:deploy
```

Install the extension for Hyva

1. Run the command

```
composer require mirasvit/module-navigation-hyva:*
```

2. Enable installed Hyva modules:

```
bin/magento module:enable Hyva_MirasvitLayeredNavigation Hyva_Mirasvit
```

3. Update Magento database schema and data with the command:

```
bin/magento setup:upgrade
```

4. Compile the code of the installed extension:

```
bin/magento setup:di:compile
```

5. Compile the code of the installed extension:

```
cd /path/to/theme/web/tailwind/  
npm run build-prod
```

6. Deploy the static view files

```
cd /path/to/project/  
  
rm -rf pub/static/*; rm -rf var/view_preprocessed/*;  
php -f bin/magento setup:static-content:deploy
```

7. Run the command below to clean the cache:

```
bin/magento cache:flush
```

Quick Start

Layered Navigation is a straightforward extension which replaces standard catalog filters immediately after installation. Basically, it's ready to work right out of the box.

However, there are certain elements which are worth your while to get tuned-up.

1. Layered Navigation needs to be seamlessly integrated to your theme. Visit the [General](#) and [Highlight](#) section of Configuration, and fit the layered navigation to your theme.

Note

Do not forget to clean cache **after applying any change**.

2. Review the attributes of your products, and set those that you wish to be [added to Layered Navigation](#) as **Filterable**.
3. Some attributes can have too many options to select. To optimize your navigation, use [Links Limit](#).
4. You may wish to make navigation more attractive by changing your selection of widgets to images. Use [Widget Override](#) feature for that.
5. Configure additional filters, such as **New Arrivals** or **On Stock** using the [Additional Filters](#) section of configuration.
6. You can also make links in Layered Navigation Widgets [more SEO-friendly](#), which will help web-crawlers index your store more effectively.

This should be a good start. Refer to corresponding sections of this manual to know more.

Layered Navigation Settings

This section describes most settings that you can use when configuring your layered navigation.

It is located in the **Stores -> Configuration -> Mirasvit Extensions -> Layered Navigation** section, and breaks into the following subsections which you can see at the sidebar:

Note

After changing of any option described below, navigate to **System -> Tools -> Cache Management** and **clear ALL cache** to apply the CSS changes which correspond to changed options.

General

This section contains the most basic options that define the behavior of Layered Navigation.

Option	Description
Enabled Ajax	Allows to update filters and catalog list via AJAX
Filters Applying Mode	Defines how filter will be applied. There are two available modes: Instantly (the filter is applied immediately after click), By button click .
Options Counts Precalculation	Allows you to calculate filter options counts after option selection in By button click mode.
Scroll To Top After Filters Applied	Allows you to scroll page to top after filter applied.

Option	Description
Enabled Multiselect	Allows you to select multiple filter options simultaneously, creating flexible and complex filters.
Show Opened Filters	If this option is set to Yes , opened filters will be displayed at the top of the filtered product list.
Limit for opened filters	The number of filters which can be opened by default. For allowing all filters to be opened, leave this field empty. Active filters are always opened.
Hide Unuseful Filter Option	If this option is set to Yes , filter option will be hidden if this option matches all products in current category.
Sticky Sidebar	Allows you to stick sidebar when product list is scrolling.

[Back to Top](#)

Styling

Option	Description
Filter item Display Mode	<p>Defines widget, which will be used for filter option selection. There are four available widgets: Default (link) (used default widget, defined in your theme), Simple Checkbox, Checkbox, and Circle. These widgets will be used for all properties with enumerated values.</p> <p>Note</p> <p>You can override this option and define custom icons for each enumerated value using Attribute Navigation Images.</p>
Checkbox or circle background color	Displayed when Checkbox or Circle options are selected in the previous setting. Defines a background of the checkbox or circle.
Checkbox or circle border color	Displayed when Checkbox or Circle options are selected in the Display options setting. Defines a border color of the checkbox or circle.
Checkbox or circle checked color	Displayed when Checkbox or Circle options are selected in the master Display options setting. Defines a selection color of the checkbox or circle.
Slider main color	Defines the color of the slider inside the values range
Slider secondary color	Defines the color of the slider outside the values range
Enabled highlight for links	Enables options (filter links) highlighting
Highlight color	Defines a color for options (filter links) highlighting Allows adding custom CSS code for styling filters.
Additional CSS	<p>Note</p> <p>To avoid unexpected changes in styles CSS selectors should start with the selector of the parent block of the navigation bar e.g. <code>.sidebar-main</code> or <code>.block.filter</code> (depending on the theme)</p>

[Back to Top](#)

Links Limit

Option	Description
Display Mode	Defines how options will be displayed. There are three available widgets: Disabled (no limits) (widget used by default as defined in your theme), Scroll box , and Show/hide link .
Scroll height (px)	Displayed when Scroll box option is selected in the previous setting. Defines the height of the scroll box.
Links limit	Displayed when Show/hide link option is selected in the previous setting. Show only specified amount links for filters, integer value.
Limit for alphabetical index	Show alphabetical index only if the number of visible options higher than limit. Set 0 or leave this option empty to always display alphabetical index.
Less text	Displayed when a Show/hide link option is selected in the previous setting. Text which will be used as a button to collapse the filter to a limited quantity of options.
More text	Displayed when a Show/hide link option is selected in the previous setting. Text, which will be used as a button to expand the filter to the full quantity of options.

[Back to Top](#)

Additional Filters

This section has 6 additional filters provided by our extension: [Category Filter](#), [New Products](#), [On Sale Stock](#), [Rating](#) and [Search Filter](#).

Category Filter

This is the default filter by category with additional settings.

Option	Description
Enabled	Allows you to use this filter in navigation
Show Nested Categories	If enabled, extension will show nested (subcategories) as a tree
Sort Options by	Defines the sorting order for categories layered navigation. Applicable only if Show Nested Categories is set to No .
Use Alphabetical Index	Allows you to use alphabetical index for category filter. Applicable only if Show Nested Categories is set to No . For more information refer to Alphabetical Index in Product Attributes Navigation Options.

New Products

This shows only the new arrivals.

Option	Description
Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar

Option	Description
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

On Sale

This shows products that are registered as "for sale" (e.g. with a discount).

Option	Description
Enabled	Allows using this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Stocks

This filter shows products that are in stock and can be bought.

Option	Description
Enabled	Allows this filter to be used in navigation
Label	Text label which will mark this filter at the navigation sidebar
In Stock Filter Label	Text which is used to mark products, available for shopping
Out of Stock Filter Label	Text which is used to mark products that are out of stock
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Rating

This filter shows the rating as calculated on a customer's review. It also utilizes a custom widget with stars.

Option	Description
Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Search Filter

This filter's behavior can be configured. Depending on the enabled options, it can work as a fulltext search on the current category page, as a filter for attribute options filters, or both.

If both options are disabled, the Search Filter won't be displayed even when enabled.

Option	Description
Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter on the navigation sidebar
Fulltext Search	If enabled, the search field will work as a fulltext search inside the category page
Search by Attribute Options	If enabled, a pop-up block will be added with attributes and options that match the search query

[Back to Top](#)

Horizontal filters and Panel

This deals with displaying the filters which should be shown on the sidebar.

Option	Description
Select filters to show in horizontal navigation	Multi-selection option, which defines filters, eligible for navigation. They are defined at Stores -> Attributes -> Product . To become a filter, the attribute should be enumerable, and the option Use in Layered Navigation should be enabled in Storefront Properties . Horizontal filters will be hidden in vertical navigation. To Show Additional Filters (New, Sale, Stock, Rating), those particular filters should be enabled.
Hide horizontal filters if the screen size is less than (px)	Defines height, at which extension will shrink and hide horizontal filters.

[Back to Top](#)

Filter clear block

A clear block is a block where customer can cancel one or more filters.

Option	Description
Filter clear block position	Defines the position of that block. There are two options available: Default (within sidebar) and Horizontal
Group options by attribute	Defines how selected filters should be grouped.

[Back to Top](#)

SEO

Option	Description
Robots meta header for pages with applied filters	This directive controls page visibility by search engine crawlers. It's recommended to use the NOINDEX, NOFOLLOW option to avoid indexation of duplicate content by search engines like Google unless you use friendly URLs.

Option

Description

Defines the "preferred" version for current page. Helps to prevent duplicate content issues.

Options:

- **Current Url** - always uses the same URL as in the browser's address panel. For example:

Address URL: "<http://example.com/veronica/red.html?activity=5174>"

Canonical URL: "<http://example.com/veronica/red.html?activity=5174>"

- **URL without applied filters and GET parameters** - canonical URL always points to a genuine page URL, removing applied filters (even with friendly URLs) and GET parameters.

For example:

Address URL: "<http://example.com/veronica/red.html?activity=5174>"

Canonical URL: "<http://example.com/veronica.html>"

- **URL without GET parameters** - canonical URL points to the URL specified in the browser's address panel, but without GET parameters.

For example:

Address URL: "<http://example.com/veronica/red.html?activity=5174>"

Canonical URL: "<http://example.com/veronica/red.html>"

Canonical link for pages with applied filters

[Back to Top](#)

Product Attribute Linking

Option

Description

If enabled, for each filterable attribute value on the product view page the extension will generate the link with the filter by that attribute

Enabled

The screenshot shows a product view page with three tabs: 'Details', 'More Information', and 'Reviews (2)'. The 'Details' tab is active. Under 'Details', there are four attributes: 'Activity' (Gym, Outdoor, Recreation, Sports), 'Material' (Plastic, Rubber), 'Gender' (Men), and 'Category' (Electronic, Exercise, Timepiece). The 'Activity' attribute is highlighted with a red dashed box. A red dashed arrow points from this box to the 'Gym' filter option in the 'ACTIVITY' dropdown menu on the right. The dropdown menu shows 'ACTIVITY' with a count of 1, and a list of filter options: 'Outdoor (4)', 'Recreation (7)', 'Gym (5)', 'Athletic (5)', and 'Sports (4)'. The 'Gym' option is selected.

Target Defines whenever the attribute link should be opened in the same tab or in the new one

[Back to Top](#)

Layered Navigation Settings

This section describes most settings that you can use when configuring your layered navigation.

It is located in the **Stores -> Configuration -> Mirasvit Extensions -> Layered Navigation** section, and breaks into the following subsections which you can see at the sidebar:

Note

After changing of any option described below, navigate to **System -> Tools -> Cache Management** and clear **ALL cache** to apply the CSS changes which correspond to changed options.

General

This section contains the most basic options that define the behavior of Layered Navigation.

Option	Description
Enabled Ajax	Allows to update filters and catalog list via AJAX
Filters Applying Mode	Defines how filter will be applied. There are two available modes: Instantly (the filter is applied immediately after click), By button click .
Options Counts Precalculation	Allows you to calculate filter options counts after option selection in By button click mode.
Scroll To Top After Filters Applied	Allows you to scroll page to top after filter applied.
Enabled Multiselect	Allows you to select multiple filter options simultaneously, creating flexible and complex filters.
Show Opened Filters	If this option is set to Yes , opened filters will be displayed at the top of the filtered product list.
Limit for opened filters	The number of filters which can be opened by default. For allowing all filters to be opened, leave this field empty. Active filters are always opened.
Hide Unuseful Filter Option	If this option is set to Yes , filter option will be hidden if this option matches all products in current category.
Sticky Sidebar	Allows you to stick sidebar when product list is scrolling.

[Back to Top](#)

Styling

Option	Description
Filter item Display Mode	Defines widget, which will be used for filter option selection. There are four available widgets: Default (link) (used default widget, defined in your theme), Simple Checkbox , Checkbox , and Circle . These widgets will be used for all properties with enumerated values. Note You can override this option and define custom icons for each enumerated value using Attribute Navigation Images .
Checkbox or circle background color	Displayed when Checkbox or Circle options are selected in the previous setting. Defines a background of the checkbox or circle.
Checkbox or circle border color	Displayed when Checkbox or Circle options are selected in the Display options setting. Defines a border color of the checkbox or circle.

Option	Description
Checkbox or circle checked color	Displayed when Checkbox or Circle options are selected in the master Display options setting. Defines a selection color of the checkbox or circle.
Slider main color	Defines the color of the slider inside the values range
Slider secondary color	Defines the color of the slider outside the values range
Enabled highlight for links	Enables options (filter links) highlighting
Highlight color	Defines a color for options (filter links) highlighting Allows adding custom CSS code for styling filters.
Additional CSS	Note To avoid unexpected changes in styles CSS selectors should start with the selector of the parent block of the navigation bar e.g. <code>.sidebar-main</code> or <code>.block.filter</code> (depending on the theme)

[Back to Top](#)

Links Limit

Option	Description
Display Mode	Defines how options will be displayed. There are three available widgets: Disabled (no limits) (widget used by default as defined in your theme), Scroll box , and Show/hide link .
Scroll height (px)	Displayed when Scroll box option is selected in the previous setting. Defines the height of the scroll box.
Links limit	Displayed when Show/hide link option is selected in the previous setting. Show only specified amount links for filters, integer value.
Limit for alphabetical index	Show alphabetical index only if the number of visible options higher than limit. Set 0 or leave this option empty to always display alphabetical index.
Less text	Displayed when a Show/hide link option is selected in the previous setting. Text which will be used as a button to collapse the filter to a limited quantity of options.
More text	Displayed when a Show/hide link option is selected in the previous setting. Text, which will be used as a button to expand the filter to the full quantity of options.

[Back to Top](#)

Additional Filters

This section has 6 additional filters provided by our extension: [Category Filter](#), [New Products](#), [On Sale Stock](#), [Rating](#) and [Search Filter](#).

Category Filter

This is the default filter by category with additional settings.

Option	Description
Enabled	Allows you to use this filter in navigation
Show Nested Categories	If enabled, extension will show nested (subcategories) as a tree
Sort Options by	Defines the sorting order for categories layered navigation. Applicable only if Show Nested Categories is set to No .
Use Alphabetical Index	Allows you to use alphabetical index for category filter. Applicable only if Show Nested Categories is set to No . For more information refer to Alphabetical Index in Product Attributes Navigation Options.

New Products

This shows only the new arrivals.

Option	Description
Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

On Sale

This shows products that are registered as "for sale" (e.g. with a discount).

Option	Description
Enabled	Allows using this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Stocks

This filter shows products that are in stock and can be bought.

Option	Description
Enabled	Allows this filter to be used in navigation
Label	Text label which will mark this filter at the navigation sidebar
In Stock Filter Label	Text which is used to mark products, available for shopping
Out of Stock Filter Label	Text which is used to mark products that are out of stock
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Rating

This filter shows the rating as calculated on a customer's review. It also utilizes a custom widget with stars.

Option	Description
Enabled	Allows you to use this filter in navigation

Option	Description
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Search Filter

This filter's behavior can be configured. Depending on the enabled options, it can work as a fulltext search on the current category page, as a filter for attribute options filters, or both. If both options are disabled, the Search Filter won't be displayed even when enabled.

Option	Description
Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter on the navigation sidebar
Fulltext Search	If enabled, the search field will work as a fulltext search inside the category page
Search by Attribute Options	If enabled, a pop-up block will be added with attributes and options that match the search query

[Back to Top](#)

Horizontal filters and Panel

This deals with displaying the filters which should be shown on the sidebar.

Option	Description
Select filters to show in horizontal navigation	Multi-selection option, which defines filters, eligible for navigation. They are defined at Stores -> Attributes -> Product . To become a filter, the attribute should be enumerable, and the option Use in Layered Navigation should be enabled in Storefront Properties . Horizontal filters will be hidden in vertical navigation. To Show Additional Filters (New, Sale, Stock, Rating), those particular filters should be enabled.
Hide horizontal filters if the screen size is less than (px)	Defines height, at which extension will shrink and hide horizontal filters.

[Back to Top](#)

Filter clear block

A clear block is a block where customer can cancel one or more filters.

Option	Description
Filter clear block position	Defines the position of that block. There are two options available: Default (within sidebar) and Horizontal
Group options by attribute	Defines how selected filters should be grouped.

SEO

Option	Description
Robots meta header for pages with applied filters	<p>This directive controls page visibility by search engine crawlers. It's recommended to use the NOINDEX, NOFOLLOW option to avoid indexation of duplicate content by search engines like Google unless you use friendly URLs.</p> <p>Defines the "preferred" version for current page. Helps to prevent duplicate content issues.</p> <p>Options:</p> <ul style="list-style-type: none">- Current Url - always uses the same URL as in the browser's address panel. For example: <i>Address URL:</i> "http://example.com/veronica/red.html?activity=5174" <i>Canonical URL:</i> "http://example.com/veronica/red.html?activity=5174"- URL without applied filters and GET parameters - canonical URL always points to a genuine page URL, removing applied filters (even with friendly URLs) and GET parameters. For example: <i>Address URL:</i> "http://example.com/veronica/red.html?activity=5174" <i>Canonical URL:</i> "http://example.com/veronica.html"- URL without GET parameters - canonical URL points to the URL specified in the browser's address panel, but without GET parameters. For example: <i>Address URL:</i> "http://example.com/veronica/red.html?activity=5174" <i>Canonical URL:</i> "http://example.com/veronica/red.html"
Canonical link for pages with applied filters	

[Back to Top](#)

Product Attribute Linking

Option	Description
Enabled	<p>If enabled, for each filterable attribute value on the product view page the extension will generate the link with the filter by that attribute</p>  <p>The screenshot shows a product view page with three tabs: 'Details', 'More Information', and 'Reviews (2)'. Under 'More Information', there are four attributes: 'Activity' (Gym, Outdoor, Recreation, Sports), 'Material' (Plastic, Rubber), 'Gender' (Men), and 'Category' (Electronic, Exercise, Timepiece). On the right, there is a filter dropdown for 'ACTIVITY' with a '1' in a box. The 'Gym' option is selected and highlighted in orange, with a red dashed arrow pointing from the 'Gym' value in the 'Activity' attribute list to it.</p>

Target Defines whenever the attribute link should be opened in the same tab or in the new one

[Back to Top](#)

Layered Navigation Settings

This section describes most settings that you can use when configuring your layered navigation.

It is located in the **Stores -> Configuration -> Mirasvit Extensions -> Layered Navigation** section, and breaks into the following subsections which you can see at the sidebar:

Note

After changing of any option described below, navigate to **System -> Tools -> Cache Management** and **clear ALL cache** to apply the CSS changes which correspond to changed options.

General

This section contains the most basic options that define the behavior of Layered Navigation.

Option	Description
Enabled Ajax	Allows to update filters and catalog list via AJAX
Filters Applying Mode	Defines how filter will be applied. There are two available modes: Instantly (the filter is applied immediately after click), By button click .
Options Counts Precalculation	Allows you to calculate filter options counts after option selection in By button click mode.
Scroll To Top After Filters Applied	Allows you to scroll page to top after filter applied.
Enabled Multiselect	Allows you to select multiple filter options simultaneously, creating flexible and complex filters.
Show Opened Filters	If this option is set to Yes , opened filters will be displayed at the top of the filtered product list.
Limit for opened filters	The number of filters which can be opened by default. For allowing all filters to be opened, leave this field empty. Active filters are always opened.
Hide Unuseful Filter Option	If this option is set to Yes , filter option will be hidden if this option matches all products in current category.
Sticky Sidebar	Allows you to stick sidebar when product list is scrolling.

[Back to Top](#)

Styling

Option	Description
--------	-------------

Defines widget, which will be used for filter option selection. There are four available widgets: **Default (link)** (used default widget, defined in your theme), **Simple Checkbox**, **Checkbox**, and **Circle**. These widgets will be used for all properties with enumerated values.

Filter item Display Mode

Note

You can override this option and define custom icons for each enumerated value using [Attribute Navigation Images](#).

Checkbox or circle background color Displayed when **Checkbox** or **Circle** options are selected in the previous setting. Defines a background of the checkbox or circle.

Checkbox or circle border color Displayed when **Checkbox** or **Circle** options are selected in the **Display options** setting. Defines a border color of the checkbox or circle.

Checkbox or circle checked color Displayed when **Checkbox** or **Circle** options are selected in the master **Display options** setting. Defines a selection color of the checkbox or circle.

Slider main color Defines the color of the slider inside the values range

Slider secondary color Defines the color of the slider outside the values range

Enabled highlight for links Enables options (filter links) highlighting

Highlight color Defines a color for options (filter links) highlighting
Allows adding custom CSS code for styling filters.

Note

Additional CSS To avoid unexpected changes in styles CSS selectors should start with the selector of the parent block of the navigation bar e.g. `.sidebar-main` or `.block.filter` (depending on the theme)

[Back to Top](#)

Links Limit

Option	Description
Display Mode	Defines how options will be displayed. There are three available widgets: Disabled (no limits) (widget used by default as defined in your theme), Scroll box , and Show/hide link .
Scroll height (px)	Displayed when Scroll box option is selected in the previous setting. Defines the height of the scroll box.
Links limit	Displayed when Show/hide link option is selected in the previous setting. Show only specified amount links for filters, integer value.
Limit for alphabetical index	Show alphabetical index only if the number of visible options higher than limit. Set 0 or leave this option empty to always display alphabetical index.
Less text	Displayed when a Show/hide link option is selected in the previous setting. Text which will be used as a button to collapse the filter to a limited quantity of options.
More text	Displayed when a Show/hide link option is selected in the previous setting. Text, which will be used as a button to expand the filter to the full quantity of options.

[Back to Top](#)

Additional Filters

This section has 6 additional filters provided by our extension: [Category Filter](#), [New Products](#), [On Sale Stock](#), [Rating](#) and [Search Filter](#).

Category Filter

This is the default filter by category with additional settings.

Option	Description
Enabled	Allows you to use this filter in navigation
Show Nested Categories	If enabled, extension will show nested (subcategories) as a tree
Sort Options by	Defines the sorting order for categories layered navigation. Applicable only if Show Nested Categories is set to No .
Use Alphabetical Index	Allows you to use alphabetical index for category filter. Applicable only if Show Nested Categories is set to No . For more information refer to Alphabetical Index in Product Attributes Navigation Options.

New Products

This shows only the new arrivals.

Option	Description
Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

On Sale

This shows products that are registered as "for sale" (e.g. with a discount).

Option	Description
Enabled	Allows using this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Stocks

This filter shows products that are in stock and can be bought.

Option	Description
Enabled	Allows this filter to be used in navigation

Option

Description

Label	Text label which will mark this filter at the navigation sidebar
In Stock Filter Label	Text which is used to mark products, available for shopping
Out of Stock Filter Label	Text which is used to mark products that are out of stock
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Rating

This filter shows the rating as calculated on a customer's review. It also utilizes a custom widget with stars.

Option

Description

Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Search Filter

This filter's behavior can be configured. Depending on the enabled options, it can work as a fulltext search on the current category page, as a filter for attribute options filters, or both.

If both options are disabled, the Search Filter won't be displayed even when enabled.

Option

Description

Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter on the navigation sidebar
Fulltext Search	If enabled, the search field will work as a fulltext search inside the category page
Search by Attribute Options	If enabled, a pop-up block will be added with attributes and options that match the search query

[Back to Top](#)

Horizontal filters and Panel

This deals with displaying the filters which should be shown on the sidebar.

Option

Description

Select filters to show in horizontal navigation	Multi-selection option, which defines filters, eligible for navigation. They are defined at Stores -> Attributes -> Product . To become a filter, the attribute should be enumerable, and the option Use in Layered Navigation should be enabled in Storefront Properties . Horizontal filters will be hidden in vertical navigation. To Show Additional Filters (New, Sale, Stock, Rating), those particular filters should be enabled.
Hide horizontal filters if the screen size is less than (px)	Defines height, at which extension will shrink and hide horizontal filters.

[Back to Top](#)

Filter clear block

A clear block is a block where customer can cancel one or more filters.

Option	Description
Filter clear block position	Defines the position of that block. There are two options available: Default (within sidebar) and Horizontal
Group options by attribute	Defines how selected filters should be grouped.

[Back to Top](#)

SEO

Option	Description
Robots meta header for pages with applied filters	<p>This directive controls page visibility by search engine crawlers. It's recommended to use the NOINDEX, NOFOLLOW option to avoid indexation of duplicate content by search engines like Google unless you use friendly URLs.</p> <p>Defines the "preferred" version for current page. Helps to prevent duplicate content issues.</p> <p>Options:</p> <ul style="list-style-type: none">- Current Url - always uses the same URL as in the browser's address panel. For example: <i>Address URL:</i> "http://example.com/veronica/red.html?activity=5174" <i>Canonical URL:</i> "http://example.com/veronica/red.html?activity=5174"- URL without applied filters and GET parameters - canonical URL always points to a genuine page URL, removing applied filters (even with friendly URLs) and GET parameters. For example: <i>Address URL:</i> "http://example.com/veronica/red.html?activity=5174" <i>Canonical URL:</i> "http://example.com/veronica.html"- URL without GET parameters - canonical URL points to the URL specified in the browser's address panel, but without GET parameters. For example: <i>Address URL:</i> "http://example.com/veronica/red.html?activity=5174" <i>Canonical URL:</i> "http://example.com/veronica/red.html"
Canonical link for pages with applied filters	

[Back to Top](#)

Product Attribute Linking

Option	Description
--------	-------------

If enabled, for each filterable attribute value on the product view page the extension will generate the link with the filter by that attribute

Enabled

The image shows a product view page with three tabs: 'Details', 'More Information', and 'Reviews (2)'. Under 'More Information', there are four filterable attributes: 'Activity' (Gym, Outdoor, Recreation, Sports), 'Material' (Plastic, Rubber), 'Gender' (Men), and 'Category' (Electronic, Exercise, Timepiece). A red dashed box highlights the 'Gym' option in the 'Activity' attribute. A red arrow points from this box to the 'Gym (5)' option in the filter sidebar. The sidebar has a 'CATEGORY' dropdown and an 'ACTIVITY' section with a '1' button and an upward arrow. Below are five options: 'Outdoor (4)', 'Recreation (7)', 'Gym (5)', 'Athletic (5)', and 'Sports (4)'. The 'Gym' option is selected with a red square.

Target Defines whenever the attribute link should be opened in the same tab or in the new one

Layered Navigation Settings

This section describes most settings that you can use when configuring your layered navigation.

It is located in the **Stores -> Configuration -> Mirasvit Extensions -> Layered Navigation** section, and breaks into the following subsections which you can see at the sidebar:

Note

After changing of any option described below, navigate to **System -> Tools -> Cache Management** and clear **ALL cache** to apply the CSS changes which correspond to changed options.

General

This section contains the most basic options that define the behavior of Layered Navigation.

Option	Description
Enabled Ajax	Allows to update filters and catalog list via AJAX
Filters Applying Mode	Defines how filter will be applied. There are two available modes: Instantly (the filter is applied immediately after click), By button click .
Options Counts Precalculation	Allows you to calculate filter options counts after option selection in By button click mode.
Scroll To Top After Filters Applied	Allows you to scroll page to top after filter applied.
Enabled Multiselect	Allows you to select multiple filter options simultaneously, creating flexible and complex filters.

Option	Description
Show Opened Filters	If this option is set to Yes , opened filters will be displayed at the top of the filtered product list.
Limit for opened filters	The number of filters which can be opened by default. For allowing all filters to be opened, leave this field empty. Active filters are always opened.
Hide Unuseful Filter Option	If this option is set to Yes , filter option will be hidden if this option matches all products in current category.
Sticky Sidebar	Allows you to stick sidebar when product list is scrolling.

[Back to Top](#)

Styling

Option	Description
Filter item Display Mode	<p>Defines widget, which will be used for filter option selection. There are four available widgets: Default (link) (used default widget, defined in your theme), Simple Checkbox, Checkbox, and Circle. These widgets will be used for all properties with enumerated values.</p> <p>Note</p> <p>You can override this option and define custom icons for each enumerated value using Attribute Navigation Images.</p>
Checkbox or circle background color	Displayed when Checkbox or Circle options are selected in the previous setting. Defines a background of the checkbox or circle.
Checkbox or circle border color	Displayed when Checkbox or Circle options are selected in the Display options setting. Defines a border color of the checkbox or circle.
Checkbox or circle checked color	Displayed when Checkbox or Circle options are selected in the master Display options setting. Defines a selection color of the checkbox or circle.
Slider main color	Defines the color of the slider inside the values range
Slider secondary color	Defines the color of the slider outside the values range
Enabled highlight for links	Enables options (filter links) highlighting
Highlight color	Defines a color for options (filter links) highlighting Allows adding custom CSS code for styling filters.
Additional CSS	<p>Note</p> <p>To avoid unexpected changes in styles CSS selectors should start with the selector of the parent block of the navigation bar e.g. <code>.sidebar-main</code> or <code>.block.filter</code> (depending on the theme)</p>

[Back to Top](#)

Links Limit

Option	Description
Display Mode	Defines how options will be displayed. There are three available widgets: Disabled (no limits) (widget used by default as defined in your theme), Scroll box , and Show/hide link .
Scroll height (px)	Displayed when Scroll box option is selected in the previous setting. Defines the height of the scroll box.
Links limit	Displayed when Show/hide link option is selected in the previous setting. Show only specified amount links for filters, integer value.
Limit for alphabetical index	Show alphabetical index only if the number of visible options higher than limit. Set 0 or leave this option empty to always display alphabetical index.
Less text	Displayed when a Show/hide link option is selected in the previous setting. Text which will be used as a button to collapse the filter to a limited quantity of options.
More text	Displayed when a Show/hide link option is selected in the previous setting. Text, which will be used as a button to expand the filter to the full quantity of options.

[Back to Top](#)

Additional Filters

This section has 6 additional filters provided by our extension: [Category Filter](#), [New Products](#), [On Sale Stock](#), [Rating](#) and [Search Filter](#).

Category Filter

This is the default filter by category with additional settings.

Option	Description
Enabled	Allows you to use this filter in navigation
Show Nested Categories	If enabled, extension will show nested (subcategories) as a tree
Sort Options by	Defines the sorting order for categories layered navigation. Applicable only if Show Nested Categories is set to No .
Use Alphabetical Index	Allows you to use alphabetical index for category filter. Applicable only if Show Nested Categories is set to No . For more information refer to Alphabetical Index in Product Attributes Navigation Options.

New Products

This shows only the new arrivals.

Option	Description
Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

On Sale

This shows products that are registered as "for sale" (e.g. with a discount).

Option	Description
Enabled	Allows using this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Stocks

This filter shows products that are in stock and can be bought.

Option	Description
Enabled	Allows this filter to be used in navigation
Label	Text label which will mark this filter at the navigation sidebar
In Stock Filter Label	Text which is used to mark products, available for shopping
Out of Stock Filter Label	Text which is used to mark products that are out of stock
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Rating

This filter shows the rating as calculated on a customer's review. It also utilizes a custom widget with stars.

Option	Description
Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Search Filter

This filter's behavior can be configured. Depending on the enabled options, it can work as a fulltext search on the current category page, as a filter for attribute options filters, or both.

If both options are disabled, the Search Filter won't be displayed even when enabled.

Option	Description
Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter on the navigation sidebar
Fulltext Search	If enabled, the search field will work as a fulltext search inside the category page
Search by Attribute Options	If enabled, a pop-up block will be added with attributes and options that match the search query

[Back to Top](#)

Horizontal filters and Panel

This deals with displaying the filters which should be shown on the sidebar.

Option	Description
Select filters to show in horizontal navigation	Multi-selection option, which defines filters, eligible for navigation. They are defined at Stores -> Attributes -> Product . To become a filter, the attribute should be enumerable, and the option Use in Layered Navigation should be enabled in Storefront Properties . Horizontal filters will be hidden in vertical navigation. To Show Additional Filters (New, Sale, Stock, Rating), those particular filters should be enabled.
Hide horizontal filters if the screen size is less than (px)	Defines height, at which extension will shrink and hide horizontal filters.

[Back to Top](#)

Filter clear block

A clear block is a block where customer can cancel one or more filters.

Option	Description
Filter clear block position	Defines the position of that block. There are two options available: Default (within sidebar) and Horizontal
Group options by attribute	Defines how selected filters should be grouped.

[Back to Top](#)

SEO

Option	Description
Robots meta header for pages with applied filters	This directive controls page visibility by search engine crawlers. It's recommended to use the NOINDEX, NOFOLLOW option to avoid indexation of duplicate content by search engines like Google unless you use friendly URLs.
Canonical link for pages with applied filters	<p>Defines the "preferred" version for current page. Helps to prevent duplicate content issues.</p> <p>Options:</p> <ul style="list-style-type: none"> - Current Url - always uses the same URL as in the browser's address panel. For example: Address URL: "http://example.com/veronica/red.html?activity=5174" Canonical URL: "http://example.com/veronica/red.html?activity=5174" - URL without applied filters and GET parameters - canonical URL always points to a genuine page URL, removing applied filters (even with friendly URLs) and GET parameters. For example: Address URL: "http://example.com/veronica/red.html?activity=5174" Canonical URL: "http://example.com/veronica.html" - URL without GET parameters - canonical URL points to the URL specified in the browser's address panel, but without GET parameters. For example: Address URL: "http://example.com/veronica/red.html?activity=5174" Canonical URL: "http://example.com/veronica/red.html"

[Back to Top](#)

Product Attribute Linking

Option

Description

If enabled, for each filterable attribute value on the product view page the extension will generate the link with the filter by that attribute

Enabled

The screenshot shows a product page with three tabs: 'Details', 'More Information', and 'Reviews (2)'. Under 'More Information', there are four attributes: 'Activity' (Gym, Outdoor, Recreation, Sports), 'Material' (Plastic, Rubber), 'Gender' (Men), and 'Category' (Electronic, Exercise, Timepiece). A red dashed box highlights the 'Gym' value under 'Activity'. A red dashed arrow points from this box to the 'Gym' filter option in the 'ACTIVITY' dropdown menu on the right. The dropdown menu shows 'ACTIVITY' with a count of 1, and a list of options: 'Outdoor (4)', 'Recreation (7)', 'Gym (5)', 'Athletic (5)', and 'Sports (4)'. The 'Gym' option is selected with a red square.

Target Defines whenever the attribute link should be opened in the same tab or in the new one

[Back to Top](#)

Layered Navigation Settings

This section describes most settings that you can use when configuring your layered navigation.

It is located in the **Stores -> Configuration -> Mirasvit Extensions -> Layered Navigation** section, and breaks into the following subsections which you can see at the sidebar:

Note

After changing of any option described below, navigate to **System -> Tools -> Cache Management** and **clear ALL cache** to apply the CSS changes which correspond to changed options.

General

This section contains the most basic options that define the behavior of Layered Navigation.

Option

Description

Enabled Ajax

Allows to update filters and catalog list via AJAX

Filters Applying Mode

Defines how filter will be applied. There are two available modes: **Instantly** (the filter is applied immediately after click), **By button click**.

Option	Description
Options Counts Precalculation	Allows you to calculate filter options counts after option selection in By button click mode.
Scroll To Top After Filters Applied	Allows you to scroll page to top after filter applied.
Enabled Multiselect	Allows you to select multiple filter options simultaneously, creating flexible and complex filters.
Show Opened Filters	If this option is set to Yes , opened filters will be displayed at the top of the filtered product list.
Limit for opened filters	The number of filters which can be opened by default. For allowing all filters to be opened, leave this field empty. Active filters are always opened.
Hide Unuseful Filter Option	If this option is set to Yes , filter option will be hidden if this option matches all products in current category.
Sticky Sidebar	Allows you to stick sidebar when product list is scrolling.

[Back to Top](#)

Styling

Option	Description
Filter item Display Mode	Defines widget, which will be used for filter option selection. There are four available widgets: Default (link) (used default widget, defined in your theme), Simple Checkbox , Checkbox , and Circle . These widgets will be used for all properties with enumerated values. Note You can override this option and define custom icons for each enumerated value using Attribute Navigation Images .
Checkbox or circle background color	Displayed when Checkbox or Circle options are selected in the previous setting. Defines a background of the checkbox or circle.
Checkbox or circle border color	Displayed when Checkbox or Circle options are selected in the Display options setting. Defines a border color of the checkbox or circle.
Checkbox or circle checked color	Displayed when Checkbox or Circle options are selected in the master Display options setting. Defines a selection color of the checkbox or circle.
Slider main color	Defines the color of the slider inside the values range
Slider secondary color	Defines the color of the slider outside the values range
Enabled highlight for links	Enables options (filter links) highlighting
Highlight color	Defines a color for options (filter links) highlighting

Option	Description
--------	-------------

Allows adding custom CSS code for styling filters.

Note

Additional CSS

To avoid unexpected changes in styles CSS selectors should start with the selector of the parent block of the navigation bar e.g. `.sidebar-main` or `.block.filter` (depending on the theme)

[Back to Top](#)

Links Limit

Option	Description
--------	-------------

Display Mode	Defines how options will be displayed. There are three available widgets: Disabled (no limits) (widget used by default as defined in your theme), Scroll box , and Show/hide link .
Scroll height (px)	Displayed when Scroll box option is selected in the previous setting. Defines the height of the scroll box.
Links limit	Displayed when Show/hide link option is selected in the previous setting. Show only specified amount links for filters, integer value.
Limit for alphabetical index	Show alphabetical index only if the number of visible options higher than limit. Set 0 or leave this option empty to always display alphabetical index.
Less text	Displayed when a Show/hide link option is selected in the previous setting. Text which will be used as a button to collapse the filter to a limited quantity of options.
More text	Displayed when a Show/hide link option is selected in the previous setting. Text, which will be used as a button to expand the filter to the full quantity of options.

[Back to Top](#)

Additional Filters

This section has 6 additional filters provided by our extension: [Category Filter](#), [New Products](#), [On Sale Stock](#), [Rating](#) and [Search Filter](#).

Category Filter

This is the default filter by category with additional settings.

Option	Description
--------	-------------

Enabled	Allows you to use this filter in navigation
Show Nested Categories	If enabled, extension will show nested (subcategories) as a tree
Sort Options by	Defines the sorting order for categories layered navigation. Applicable only if Show Nested Categories is set to No .

Option	Description
Use Alphabetical Index	Allows you to use alphabetical index for category filter. Applicable only if Show Nested Categories is set to No . For more information refer to Alphabetical Index in Product Attributes Navigation Options.

New Products

This shows only the new arrivals.

Option	Description
Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

On Sale

This shows products that are registered as "for sale" (e.g. with a discount).

Option	Description
Enabled	Allows using this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Stocks

This filter shows products that are in stock and can be bought.

Option	Description
Enabled	Allows this filter to be used in navigation
Label	Text label which will mark this filter at the navigation sidebar
In Stock Filter Label	Text which is used to mark products, available for shopping
Out of Stock Filter Label	Text which is used to mark products that are out of stock
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Rating

This filter shows the rating as calculated on a customer's review. It also utilizes a custom widget with stars.

Option	Description
Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Search Filter

This filter's behavior can be configured. Depending on the enabled options, it can work as a fulltext search on the current category page, as a filter for attribute options filters, or both.

If both options are disabled, the Search Filter won't be displayed even when enabled.

Option	Description
Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter on the navigation sidebar
Fulltext Search	If enabled, the search field will work as a fulltext search inside the category page
Search by Attribute Options	If enabled, a pop-up block will be added with attributes and options that match the search query

[Back to Top](#)

Horizontal filters and Panel

This deals with displaying the filters which should be shown on the sidebar.

Option	Description
Select filters to show in horizontal navigation	Multi-selection option, which defines filters, eligible for navigation. They are defined at Stores -> Attributes -> Product . To become a filter, the attribute should be enumerable, and the option Use in Layered Navigation should be enabled in Storefront Properties . Horizontal filters will be hidden in vertical navigation. To Show Additional Filters (New, Sale, Stock, Rating), those particular filters should be enabled.
Hide horizontal filters if the screen size is less than (px)	Defines height, at which extension will shrink and hide horizontal filters.

[Back to Top](#)

Filter clear block

A clear block is a block where customer can cancel one or more filters.

Option	Description
Filter clear block position	Defines the position of that block. There are two options available: Default (within sidebar) and Horizontal
Group options by attribute	Defines how selected filters should be grouped.

[Back to Top](#)

SEO

Option	Description
--------	-------------

Robots meta header for pages with applied filters

This directive controls page visibility by search engine crawlers. It's recommended to use the **NOINDEX, NOFOLLOW** option to avoid indexation of duplicate content by search engines like Google unless you use friendly URLs.

Defines the "preferred" version for current page. Helps to prevent duplicate content issues.

Options:

- **Current Url** - always uses the same URL as in the browser's address panel. For example:

Address URL: "<http://example.com/veronica/red.html?activity=5174>"

Canonical URL: "<http://example.com/veronica/red.html?activity=5174>"

- **URL without applied filters and GET parameters** - canonical URL always points to a genuine page URL, removing applied filters (even with friendly URLs) and GET parameters.

For example:

Address URL: "<http://example.com/veronica/red.html?activity=5174>"

Canonical URL: "<http://example.com/veronica.html>"

- **URL without GET parameters** - canonical URL points to the URL specified in the browser's address panel, but without GET parameters.

For example:

Address URL: "<http://example.com/veronica/red.html?activity=5174>"

Canonical URL: "<http://example.com/veronica/red.html>"

Canonical link for pages with applied filters

[Back to Top](#)

Product Attribute Linking

Option

Description

If enabled, for each filterable attribute value on the product view page the extension will generate the link with the filter by that attribute

Enabled

The screenshot shows a product view page with three tabs: 'Details', 'More Information', and 'Reviews (2)'. The 'Details' tab is active. Under 'Details', there are four attributes: 'Activity' (Gym, Outdoor, Recreation, Sports), 'Material' (Plastic, Rubber), 'Gender' (Men), and 'Category' (Electronic, Exercise, Timepiece). The 'Gym' filter is highlighted with a red dashed box. A red dashed arrow points from this box to the 'Gym' filter option in the right-hand filter panel. The filter panel shows 'CATEGORY' expanded, with 'ACTIVITY' selected and 1 item. The 'Gym' filter is checked and has 5 items.

Target Defines whenever the attribute link should be opened in the same tab or in the new one

[Back to Top](#)

Layered Navigation Settings

This section describes most settings that you can use when configuring your layered navigation.

It is located in the **Stores -> Configuration -> Mirasvit Extensions -> Layered Navigation** section, and breaks into the following subsections which you can see at the sidebar:

Note

After changing of any option described below, navigate to **System -> Tools -> Cache Management** and **clear ALL cache** to apply the CSS changes which correspond to changed options.

General

This section contains the most basic options that define the behavior of Layered Navigation.

Option	Description
Enabled Ajax	Allows to update filters and catalog list via AJAX
Filters Applying Mode	Defines how filter will be applied. There are two available modes: Instantly (the filter is applied immediately after click), By button click .
Options Counts Precalculation	Allows you to calculate filter options counts after option selection in By button click mode.
Scroll To Top After Filters Applied	Allows you to scroll page to top after filter applied.
Enabled Multiselect	Allows you to select multiple filter options simultaneously, creating flexible and complex filters.
Show Opened Filters	If this option is set to Yes , opened filters will be displayed at the top of the filtered product list.
Limit for opened filters	The number of filters which can be opened by default. For allowing all filters to be opened, leave this field empty. Active filters are always opened.
Hide Unuseful Filter Option	If this option is set to Yes , filter option will be hidden if this option matches all products in current category.
Sticky Sidebar	Allows you to stick sidebar when product list is scrolling.

[Back to Top](#)

Styling

Option	Description
Filter item Display Mode	Defines widget, which will be used for filter option selection. There are four available widgets: Default (link) (used default widget, defined in your theme), Simple Checkbox , Checkbox , and Circle . These widgets will be used for all properties with enumerated values.
	Note
	You can override this option and define custom icons for each enumerated value using Attribute Navigation Images .

Option	Description
Checkbox or circle background color	Displayed when Checkbox or Circle options are selected in the previous setting. Defines a background of the checkbox or circle.
Checkbox or circle border color	Displayed when Checkbox or Circle options are selected in the Display options setting. Defines a border color of the checkbox or circle.
Checkbox or circle checked color	Displayed when Checkbox or Circle options are selected in the master Display options setting. Defines a selection color of the checkbox or circle.
Slider main color	Defines the color of the slider inside the values range
Slider secondary color	Defines the color of the slider outside the values range
Enabled highlight for links	Enables options (filter links) highlighting
Highlight color	Defines a color for options (filter links) highlighting Allows adding custom CSS code for styling filters.
Additional CSS	<p>Note</p> <p>To avoid unexpected changes in styles CSS selectors should start with the selector of the parent block of the navigation bar e.g. <code>.sidebar-main</code> or <code>.block.filter</code> (depending on the theme)</p>

[Back to Top](#)

Links Limit

Option	Description
Display Mode	Defines how options will be displayed. There are three available widgets: Disabled (no limits) (widget used by default as defined in your theme), Scroll box , and Show/hide link .
Scroll height (px)	Displayed when Scroll box option is selected in the previous setting. Defines the height of the scroll box.
Links limit	Displayed when Show/hide link option is selected in the previous setting. Show only specified amount links for filters, integer value.
Limit for alphabetical index	Show alphabetical index only if the number of visible options higher than limit. Set 0 or leave this option empty to always display alphabetical index.
Less text	Displayed when a Show/hide link option is selected in the previous setting. Text which will be used as a button to collapse the filter to a limited quantity of options.
More text	Displayed when a Show/hide link option is selected in the previous setting. Text, which will be used as a button to expand the filter to the full quantity of options.

[Back to Top](#)

Additional Filters

This section has 6 additional filters provided by our extension: [Category Filter](#), [New Products](#), [On Sale Stock](#), [Rating](#) and [Search Filter](#).

Category Filter

This is the default filter by category with additional settings.

Option	Description
Enabled	Allows you to use this filter in navigation
Show Nested Categories	If enabled, extension will show nested (subcategories) as a tree
Sort Options by	Defines the sorting order for categories layered navigation. Applicable only if Show Nested Categories is set to No .
Use Alphabetical Index	Allows you to use alphabetical index for category filter. Applicable only if Show Nested Categories is set to No . For more information refer to Alphabetical Index in Product Attributes Navigation Options.

New Products

This shows only the new arrivals.

Option	Description
Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

On Sale

This shows products that are registered as "for sale" (e.g. with a discount).

Option	Description
Enabled	Allows using this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Stocks

This filter shows products that are in stock and can be bought.

Option	Description
Enabled	Allows this filter to be used in navigation
Label	Text label which will mark this filter at the navigation sidebar
In Stock Filter Label	Text which is used to mark products, available for shopping
Out of Stock Filter Label	Text which is used to mark products that are out of stock
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Rating

This filter shows the rating as calculated on a customer's review. It also utilizes a custom widget with stars.

Option	Description
Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Search Filter

This filter's behavior can be configured. Depending on the enabled options, it can work as a fulltext search on the current category page, as a filter for attribute options filters, or both.

If both options are disabled, the Search Filter won't be displayed even when enabled.

Option	Description
Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter on the navigation sidebar
Fulltext Search	If enabled, the search field will work as a fulltext search inside the category page
Search by Attribute Options	If enabled, a pop-up block will be added with attributes and options that match the search query

[Back to Top](#)

Horizontal filters and Panel

This deals with displaying the filters which should be shown on the sidebar.

Option	Description
Select filters to show in horizontal navigation	Multi-selection option, which defines filters, eligible for navigation. They are defined at Stores -> Attributes -> Product . To become a filter, the attribute should be enumerable, and the option Use in Layered Navigation should be enabled in Storefront Properties . Horizontal filters will be hidden in vertical navigation. To Show Additional Filters (New, Sale, Stock, Rating), those particular filters should be enabled.
Hide horizontal filters if the screen size is less than (px)	Defines height, at which extension will shrink and hide horizontal filters.

[Back to Top](#)

Filter clear block

A clear block is a block where customer can cancel one or more filters.

Option	Description
Filter clear block position	Defines the position of that block. There are two options available: Default (within sidebar) and Horizontal

Option	Description
Group options by attribute	Defines how selected filters should be grouped.

[Back to Top](#)

SEO

Option	Description
Robots meta header for pages with applied filters	<p>This directive controls page visibility by search engine crawlers. It's recommended to use the NOINDEX, NOFOLLOW option to avoid indexation of duplicate content by search engines like Google unless you use friendly URLs.</p> <p>Defines the "preferred" version for current page. Helps to prevent duplicate content issues.</p> <p>Options:</p> <ul style="list-style-type: none"> - Current Url - always uses the same URL as in the browser's address panel. For example: <i>Address URL:</i> "http://example.com/veronica/red.html?activity=5174" <i>Canonical URL:</i> "http://example.com/veronica/red.html?activity=5174" - URL without applied filters and GET parameters - canonical URL always points to a genuine page URL, removing applied filters (even with friendly URLs) and GET parameters. For example: <i>Address URL:</i> "http://example.com/veronica/red.html?activity=5174" <i>Canonical URL:</i> "http://example.com/veronica.html" - URL without GET parameters - canonical URL points to the URL specified in the browser's address panel, but without GET parameters. For example: <i>Address URL:</i> "http://example.com/veronica/red.html?activity=5174" <i>Canonical URL:</i> "http://example.com/veronica/red.html"
Canonical link for pages with applied filters	

[Back to Top](#)

Product Attribute Linking

Option	Description
--------	-------------

If enabled, for each filterable attribute value on the product view page the extension will generate the link with the filter by that attribute

Target Defines whenever the attribute link should be opened in the same tab or in the new one

[Back to Top](#)

Layered Navigation Settings

This section describes most settings that you can use when configuring your layered navigation.

It is located in the **Stores -> Configuration -> Mirasvit Extensions -> Layered Navigation** section, and breaks into the following subsections which you can see at the sidebar:

Note

After changing of any option described below, navigate to **System -> Tools -> Cache Management** and clear **ALL cache** to apply the CSS changes which correspond to changed options.

General

This section contains the most basic options that define the behavior of Layered Navigation.

Option	Description
Enabled Ajax	Allows to update filters and catalog list via AJAX
Filters Applying Mode	Defines how filter will be applied. There are two available modes: Instantly (the filter is applied immediately after click), By button click .
Options Counts Precalculation	Allows you to calculate filter options counts after option selection in By button click mode.
Scroll To Top After Filters Applied	Allows you to scroll page to top after filter applied.
Enabled Multiselect	Allows you to select multiple filter options simultaneously, creating flexible and complex filters.

Option	Description
Show Opened Filters	If this option is set to Yes , opened filters will be displayed at the top of the filtered product list.
Limit for opened filters	The number of filters which can be opened by default. For allowing all filters to be opened, leave this field empty. Active filters are always opened.
Hide Unuseful Filter Option	If this option is set to Yes , filter option will be hidden if this option matches all products in current category.
Sticky Sidebar	Allows you to stick sidebar when product list is scrolling.

[Back to Top](#)

Styling

Option	Description
Filter item Display Mode	<p>Defines widget, which will be used for filter option selection. There are four available widgets: Default (link) (used default widget, defined in your theme), Simple Checkbox, Checkbox, and Circle. These widgets will be used for all properties with enumerated values.</p> <p>Note</p> <p>You can override this option and define custom icons for each enumerated value using Attribute Navigation Images.</p>
Checkbox or circle background color	Displayed when Checkbox or Circle options are selected in the previous setting. Defines a background of the checkbox or circle.
Checkbox or circle border color	Displayed when Checkbox or Circle options are selected in the Display options setting. Defines a border color of the checkbox or circle.
Checkbox or circle checked color	Displayed when Checkbox or Circle options are selected in the master Display options setting. Defines a selection color of the checkbox or circle.
Slider main color	Defines the color of the slider inside the values range
Slider secondary color	Defines the color of the slider outside the values range
Enabled highlight for links	Enables options (filter links) highlighting
Highlight color	Defines a color for options (filter links) highlighting Allows adding custom CSS code for styling filters.
Additional CSS	<p>Note</p> <p>To avoid unexpected changes in styles CSS selectors should start with the selector of the parent block of the navigation bar e.g. <code>.sidebar-main</code> or <code>.block.filter</code> (depending on the theme)</p>

[Back to Top](#)

Links Limit

Option	Description
Display Mode	Defines how options will be displayed. There are three available widgets: Disabled (no limits) (widget used by default as defined in your theme), Scroll box , and Show/hide link .
Scroll height (px)	Displayed when Scroll box option is selected in the previous setting. Defines the height of the scroll box.
Links limit	Displayed when Show/hide link option is selected in the previous setting. Show only specified amount links for filters, integer value.
Limit for alphabetical index	Show alphabetical index only if the number of visible options higher than limit. Set 0 or leave this option empty to always display alphabetical index.
Less text	Displayed when a Show/hide link option is selected in the previous setting. Text which will be used as a button to collapse the filter to a limited quantity of options.
More text	Displayed when a Show/hide link option is selected in the previous setting. Text, which will be used as a button to expand the filter to the full quantity of options.

[Back to Top](#)

Additional Filters

This section has 6 additional filters provided by our extension: [Category Filter](#), [New Products](#), [On Sale Stock](#), [Rating](#) and [Search Filter](#).

Category Filter

This is the default filter by category with additional settings.

Option	Description
Enabled	Allows you to use this filter in navigation
Show Nested Categories	If enabled, extension will show nested (subcategories) as a tree
Sort Options by	Defines the sorting order for categories layered navigation. Applicable only if Show Nested Categories is set to No .
Use Alphabetical Index	Allows you to use alphabetical index for category filter. Applicable only if Show Nested Categories is set to No . For more information refer to Alphabetical Index in Product Attributes Navigation Options.

New Products

This shows only the new arrivals.

Option	Description
Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

On Sale

This shows products that are registered as "for sale" (e.g. with a discount).

Option	Description
Enabled	Allows using this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Stocks

This filter shows products that are in stock and can be bought.

Option	Description
Enabled	Allows this filter to be used in navigation
Label	Text label which will mark this filter at the navigation sidebar
In Stock Filter Label	Text which is used to mark products, available for shopping
Out of Stock Filter Label	Text which is used to mark products that are out of stock
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Rating

This filter shows the rating as calculated on a customer's review. It also utilizes a custom widget with stars.

Option	Description
Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Search Filter

This filter's behavior can be configured. Depending on the enabled options, it can work as a fulltext search on the current category page, as a filter for attribute options filters, or both.

If both options are disabled, the Search Filter won't be displayed even when enabled.

Option	Description
Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter on the navigation sidebar
Fulltext Search	If enabled, the search field will work as a fulltext search inside the category page
Search by Attribute Options	If enabled, a pop-up block will be added with attributes and options that match the search query

[Back to Top](#)

Horizontal filters and Panel

This deals with displaying the filters which should be shown on the sidebar.

Option	Description
Select filters to show in horizontal navigation	Multi-selection option, which defines filters, eligible for navigation. They are defined at Stores -> Attributes -> Product . To become a filter, the attribute should be enumerable, and the option Use in Layered Navigation should be enabled in Storefront Properties . Horizontal filters will be hidden in vertical navigation. To Show Additional Filters (New, Sale, Stock, Rating), those particular filters should be enabled.
Hide horizontal filters if the screen size is less than (px)	Defines height, at which extension will shrink and hide horizontal filters.

[Back to Top](#)

Filter clear block

A clear block is a block where customer can cancel one or more filters.

Option	Description
Filter clear block position	Defines the position of that block. There are two options available: Default (within sidebar) and Horizontal
Group options by attribute	Defines how selected filters should be grouped.

[Back to Top](#)

SEO

Option	Description
Robots meta header for pages with applied filters	This directive controls page visibility by search engine crawlers. It's recommended to use the NOINDEX, NOFOLLOW option to avoid indexation of duplicate content by search engines like Google unless you use friendly URLs.
Canonical link for pages with applied filters	<p>Defines the "preferred" version for current page. Helps to prevent duplicate content issues.</p> <p>Options:</p> <ul style="list-style-type: none"> - Current Url - always uses the same URL as in the browser's address panel. For example: <i>Address URL:</i> "http://example.com/veronica/red.html?activity=5174" <i>Canonical URL:</i> "http://example.com/veronica/red.html?activity=5174" - URL without applied filters and GET parameters - canonical URL always points to a genuine page URL, removing applied filters (even with friendly URLs) and GET parameters. For example: <i>Address URL:</i> "http://example.com/veronica/red.html?activity=5174" <i>Canonical URL:</i> "http://example.com/veronica.html" - URL without GET parameters - canonical URL points to the URL specified in the browser's address panel, but without GET parameters. For example: <i>Address URL:</i> "http://example.com/veronica/red.html?activity=5174" <i>Canonical URL:</i> "http://example.com/veronica/red.html"

[Back to Top](#)

Product Attribute Linking

Option

Description

If enabled, for each filterable attribute value on the product view page the extension will generate the link with the filter by that attribute

Enabled

The image shows a product page with three tabs: 'Details', 'More Information', and 'Reviews (2)'. Under 'More Information', there are four attributes: 'Activity' (Gym, Outdoor, Recreation, Sports), 'Material' (Plastic, Rubber), 'Gender' (Men), and 'Category' (Electronic, Exercise, Timepiece). The 'Gym' value under 'Activity' is enclosed in a red dashed box. A red dashed arrow points from this box to the 'Gym' filter option in the sidebar. The sidebar shows a 'CATEGORY' dropdown menu with 'ACTIVITY' selected and a count of 1. Below it are filter options: 'Outdoor (4)', 'Recreation (7)', 'Gym (5)' (which is selected with a red square), 'Athletic (5)', and 'Sports (4)'.

Target Defines whenever the attribute link should be opened in the same tab or in the new one

[Back to Top](#)

Layered Navigation Settings

This section describes most settings that you can use when configuring your layered navigation.

It is located in the **Stores -> Configuration -> Mirasvit Extensions -> Layered Navigation** section, and breaks into the following subsections which you can see at the sidebar:

Note

After changing of any option described below, navigate to **System -> Tools -> Cache Management** and **clear ALL cache** to apply the CSS changes which correspond to changed options.

General

This section contains the most basic options that define the behavior of Layered Navigation.

Option

Description

Enabled Ajax

Allows to update filters and catalog list via AJAX

Filters Applying Mode

Defines how filter will be applied. There are two available modes: **Instantly** (the filter is applied immediately after click), **By button click**.

Option	Description
Options Counts Precalculation	Allows you to calculate filter options counts after option selection in By button click mode.
Scroll To Top After Filters Applied	Allows you to scroll page to top after filter applied.
Enabled Multiselect	Allows you to select multiple filter options simultaneously, creating flexible and complex filters.
Show Opened Filters	If this option is set to Yes , opened filters will be displayed at the top of the filtered product list.
Limit for opened filters	The number of filters which can be opened by default. For allowing all filters to be opened, leave this field empty. Active filters are always opened.
Hide Unuseful Filter Option	If this option is set to Yes , filter option will be hidden if this option matches all products in current category.
Sticky Sidebar	Allows you to stick sidebar when product list is scrolling.

[Back to Top](#)

Styling

Option	Description
Filter item Display Mode	Defines widget, which will be used for filter option selection. There are four available widgets: Default (link) (used default widget, defined in your theme), Simple Checkbox , Checkbox , and Circle . These widgets will be used for all properties with enumerated values. Note You can override this option and define custom icons for each enumerated value using Attribute Navigation Images .
Checkbox or circle background color	Displayed when Checkbox or Circle options are selected in the previous setting. Defines a background of the checkbox or circle.
Checkbox or circle border color	Displayed when Checkbox or Circle options are selected in the Display options setting. Defines a border color of the checkbox or circle.
Checkbox or circle checked color	Displayed when Checkbox or Circle options are selected in the master Display options setting. Defines a selection color of the checkbox or circle.
Slider main color	Defines the color of the slider inside the values range
Slider secondary color	Defines the color of the slider outside the values range
Enabled highlight for links	Enables options (filter links) highlighting
Highlight color	Defines a color for options (filter links) highlighting

Option	Description
--------	-------------

Allows adding custom CSS code for styling filters.

Note

Additional CSS

To avoid unexpected changes in styles CSS selectors should start with the selector of the parent block of the navigation bar e.g. `.sidebar-main` or `.block.filter` (depending on the theme)

[Back to Top](#)

Links Limit

Option	Description
--------	-------------

Display Mode	Defines how options will be displayed. There are three available widgets: Disabled (no limits) (widget used by default as defined in your theme), Scroll box , and Show/hide link .
Scroll height (px)	Displayed when Scroll box option is selected in the previous setting. Defines the height of the scroll box.
Links limit	Displayed when Show/hide link option is selected in the previous setting. Show only specified amount links for filters, integer value.
Limit for alphabetical index	Show alphabetical index only if the number of visible options higher than limit. Set 0 or leave this option empty to always display alphabetical index.
Less text	Displayed when a Show/hide link option is selected in the previous setting. Text which will be used as a button to collapse the filter to a limited quantity of options.
More text	Displayed when a Show/hide link option is selected in the previous setting. Text, which will be used as a button to expand the filter to the full quantity of options.

[Back to Top](#)

Additional Filters

This section has 6 additional filters provided by our extension: [Category Filter](#), [New Products](#), [On Sale Stock](#), [Rating](#) and [Search Filter](#).

Category Filter

This is the default filter by category with additional settings.

Option	Description
--------	-------------

Enabled	Allows you to use this filter in navigation
Show Nested Categories	If enabled, extension will show nested (subcategories) as a tree
Sort Options by	Defines the sorting order for categories layered navigation. Applicable only if Show Nested Categories is set to No .

Option	Description
Use Alphabetical Index	Allows you to use alphabetical index for category filter. Applicable only if Show Nested Categories is set to No . For more information refer to Alphabetical Index in Product Attributes Navigation Options.

New Products

This shows only the new arrivals.

Option	Description
Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

On Sale

This shows products that are registered as "for sale" (e.g. with a discount).

Option	Description
Enabled	Allows using this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Stocks

This filter shows products that are in stock and can be bought.

Option	Description
Enabled	Allows this filter to be used in navigation
Label	Text label which will mark this filter at the navigation sidebar
In Stock Filter Label	Text which is used to mark products, available for shopping
Out of Stock Filter Label	Text which is used to mark products that are out of stock
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Rating

This filter shows the rating as calculated on a customer's review. It also utilizes a custom widget with stars.

Option	Description
Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter at the navigation sidebar
Position	Numerical position of this filter (0 is the top, 100 is the bottom)

Search Filter

This filter's behavior can be configured. Depending on the enabled options, it can work as a fulltext search on the current category page, as a filter for attribute options filters, or both.

If both options are disabled, the Search Filter won't be displayed even when enabled.

Option	Description
Enabled	Allows you to use this filter in navigation
Label	Text label which will mark this filter on the navigation sidebar
Fulltext Search	If enabled, the search field will work as a fulltext search inside the category page
Search by Attribute Options	If enabled, a pop-up block will be added with attributes and options that match the search query

[Back to Top](#)

Horizontal filters and Panel

This deals with displaying the filters which should be shown on the sidebar.

Option	Description
Select filters to show in horizontal navigation	Multi-selection option, which defines filters, eligible for navigation. They are defined at Stores -> Attributes -> Product . To become a filter, the attribute should be enumerable, and the option Use in Layered Navigation should be enabled in Storefront Properties . Horizontal filters will be hidden in vertical navigation. To Show Additional Filters (New, Sale, Stock, Rating), those particular filters should be enabled.
Hide horizontal filters if the screen size is less than (px)	Defines height, at which extension will shrink and hide horizontal filters.

[Back to Top](#)

Filter clear block

A clear block is a block where customer can cancel one or more filters.

Option	Description
Filter clear block position	Defines the position of that block. There are two options available: Default (within sidebar) and Horizontal
Group options by attribute	Defines how selected filters should be grouped.

SEO

Option	Description
--------	-------------

Robots meta header for pages with applied filters

This directive controls page visibility by search engine crawlers. It's recommended to use the **NOINDEX, NOFOLLOW** option to avoid indexation of duplicate content by search engines like Google unless you use friendly URLs.

Defines the "preferred" version for current page. Helps to prevent duplicate content issues.

Options:

- **Current Url** - always uses the same URL as in the browser's address panel. For example:

Address URL: "<http://example.com/veronica/red.html?activity=5174>"

Canonical URL: "<http://example.com/veronica/red.html?activity=5174>"

- **URL without applied filters and GET parameters** - canonical URL always points to a genuine page URL, removing applied filters (even with friendly URLs) and GET parameters.

For example:

Address URL: "<http://example.com/veronica/red.html?activity=5174>"

Canonical URL: "<http://example.com/veronica.html>"

- **URL without GET parameters** - canonical URL points to the URL specified in the browser's address panel, but without GET parameters.

For example:

Address URL: "<http://example.com/veronica/red.html?activity=5174>"

Canonical URL: "<http://example.com/veronica/red.html>"

Canonical link for pages with applied filters

[Back to Top](#)

Product Attribute Linking

Option

Description

If enabled, for each filterable attribute value on the product view page the extension will generate the link with the filter by that attribute

Enabled

The screenshot shows a product view page with three tabs: 'Details', 'More Information', and 'Reviews (2)'. The 'More Information' tab is active, displaying a list of attributes: Activity, Material, Gender, and Category. The 'Activity' attribute value 'Gym' is highlighted with a red dashed box. A red dashed arrow points from this box to the 'Gym' filter option in the 'ACTIVITY' dropdown menu on the right. The dropdown menu shows 'ACTIVITY' with a count of 1, and a list of filter options: Outdoor (4), Recreation (7), Gym (5), Athletic (5), and Sports (4). The 'Gym' option is selected, indicated by a red square.

Target Defines whenever the attribute link should be opened in the same tab or in the new one

[Back to Top](#)

Brand Settings

This section describes most settings that you can use for configuring your brands.

All of them located at **Stores -> Configuration -> Mirasvit Extensions -> Brand** section.

General

This section has the most basic options which define the behavior of Brands.

Option	Description
Brand Attribute	Defines the brand's attribute.
All Brands URL	Defines URL for the brand's page.
Brand page URL	Defines how URL will be displayed. There are two available options: Long URL like /brand/apple/ or Short URL like /apple/
Brand URL Suffix	Defines suffix for brand URLs.
Use Category URL Suffix	Allows you to use Category URL Suffix.
Brands Link Position	Defines where the Link will be displayed. There are three available options: Disabled , Top Menu (first) , Top Menu (last)
Brand link label	Displayed when Top Menu (first) or Top Menu (last) option is selected in the previous setting. The option defines a link's label.
Brands Menu Mode	Sets the "Brands" menu item to either link to the "All Brands" page or open a modal with a list of brands.
Modal Menu Title	Defines the title of the brands modal window if the "Brands Menu Mode" parameter is set to Modal .
Show Not Configured Brands	If enabled, it will show simple brand pages in frontend automatically (without additional configuration).
Show all categories in filter	If enabled, show all categories in the filter. If disabled, show only top-level categories.

[Back to Top](#)

Brand page

Option	Description
Show Brand Logo	Allows using a brand logo.
Show Brand Description	Allows showing a brand description.

[Back to Top](#)

All Brands Pages

Option	Description

Option	Description
Meta Description	Allows setting a Meta Description for all brands page.

[Back to Top](#)

Brand Slider

Option	Description
WidgetCode	Create a Brand Slider widget or use this code to add a slider to a CMS page or static block.
Items Limit	Defines how many items will be available. By default will be used 4.
Order	Defines how to sort brands on the page.
Show Title	Allows to enable or disable a brand title.
Title Text	Displayed when Show Title option is selected in the previous setting. The option defines the title text.
Title Text Color	Displayed when Show Title option is selected in the previous setting. The option defines the title color. If the field is empty, the default value will be used.
Title Background Color	Displayed when the Show Title option is selected in the previous setting. The option defines the background title color. If the field is empty, the default value will be used.
Show Brand Label	Allows you to enable or disable a brand label.
Brand Label Color	Displayed when the Show Brand Label option is selected in the previous setting. The option defines the label color. If the field is empty, the default value will be applied.
Show Navigation Buttons	Allows you to enable or disable the navigation buttons.
Show Pagination	Allows you to enable or disable the pagination.
Auto Play	If Yes , the slider will be updated automatically.
Auto Play Loop	Displayed when the Auto Play option is selected in the previous setting. The option sets replay.
Auto Play Interval	Displayed when the Auto Play option is selected in the previous setting. The option sets the shift interval.
Pause on Hover	Displayed when the Auto Play option is selected in the previous setting. The option sets the pause when hovering.
Slider Width	Defines a slider width (in pixels). Leave empty in order to use the default value.
Slider Image Width	Defines a slider image width (in pixels). Leave empty in order to use the default value.
Spacing Between Images	Defines a distance between images (in pixels). The default value is 10px.
Inactive Paging Color	Defines an inactive paging color. If the field is empty, the default value will be used.
Active Paging Color	Defines an active paging color. If the field is empty, the default value will be used.
Hover Paging Color	Defines a hover paging color. If the field is empty, the default value will be used.
Navigation Buttons Color	Defines a hover paging color. If the field is empty, the default value will be used.

[Back to Top](#)

More Products From Brand

Option	Description
Enabled	Allows you to enable or disable a "more products from brand" function.
Title	Defines block title. Use {brand_name} to show the same brand name.
Products Limit	Defines how many products will be displayed. If the field is empty, only 6 products will be shown.

[Back to Top](#)

Brand Logo And Tooltip

Product List

Option	Description
Display Brand Logo on Product List	Allows you to enable or disable the option. Used in Product Listing for brand attribute should be enabled.
Product List Brand Logo Image Width	Defines a width for the product list brand logo. If the field is empty, the default value (30px) will be used.
Product List Brand Logo Tooltip	Defines brand logo tooltip. There are five available variants: Title, Small Image, Image, Description, Short Description . Leave empty in order to disable.

Product Page

Option	Description
Display Brand Logo on Product Page	Allows you to enable or disable the Brand Logo.
Display Description on Product Page	Define where the description will be displayed. There are three available variants: Disabled, Description, Short Description .
Product Page Brand Logo Image Width	Defines width for product page brand logo. If the field is empty, the default value (30px) will be used.
Product Page Brand Logo Tooltip	Defines brand logo tooltip. There are five available variants: Title, Small Image, Image, Description, Short Description . Leave empty in order to disable.

Product List & Product Page Configuration

Option	Description
Tooltip Max Image Width	Defines max tooltip image width. If the field is empty, the default value will be used.

[Back to Top](#)

SEO For Brand Pages

Option	Description
Robots meta header for brand pages	This directive controls page visibility by search engine crawlers. There are five available variants: Don't change , NOINDEX , NOFOLLOW , NOINDEX, FOLLOW , INDEX, NOFOLLOW , INDEX FOLLOW .

All Products Page

This section describes most of the settings that you can use for configuring your All Products Page.

It is located at **Stores -> Configuration -> Mirasvit Extensions -> All Products Page** section.

General

This section has basic options that define the behavior of an All Products Page.

Option	Description
Enabled	Allows you to enable/disable All Products Page.
All Products URL	Add URL for your All Products Page. Will use "all" if not configured.
Title	Defines title for All Products Page.
Meta Title	Defines meta title for All Products Page.
Meta Description	Defines meta description for All Products Page.
Show all categories in filter	Defines the way the categories will be displayed. If enabled, it will show all categories in the filter. If disabled, it will show only top-level categories.

[Back to Top](#)

SEO For All Products Page

Option	Description
Robots meta header for brand pages	This directive controls page visibility by search engine's crawlers. There are five available options: Don't change , NOINDEX , NOFOLLOW , NOINDEX, FOLLOW , INDEX, NOFOLLOW , INDEX FOLLOW .

[Back to Top](#)

Ajax Infinite Scroll

The scroll module provides you with the ability to activate the infinite scroll for traversing your catalog. It works in 2 modes:

1. **Automatic Infinite Scroll** automatically loads the next page when the user scrolls down to the bottom of the current page.
2. **Load More Button** triggers the next page load by hitting the **Load More** button.

General Settings

Go to **Stores > Configuration > Mirasvit Extensions > Scroll** section.

- **Scroll Mode** - defines, the mode used for loading next pages:
 - **Disabled** - disable scroll functionality.
 - **Infinite scroll**
 - **Load More Button**
 - **Infinite scroll + Load More Button**
 - **Load More Button + Infinite scroll**
- **Load Previous Page Button Label** - if a user opens your site by a direct link which loads the specific category page (using param "p=page_num"), our module shows the **Load Previous Page** button on top of the catalog to give the user the ability to see the previous pages.
- **Load Next Page Button Label** - label for **Load More** button.
- **Pages limit for the first pagination mode type** - set the number of pages which will be loaded by the first pagination mode type. Available only for **Infinite scroll + Load More Button** and **Load More Button + Infinite scroll** scroll modes.
- **Product List Selector** - our extension uses this selector as the starting point for the initialization of the scroll functionality. The Default Magento block which wraps products has the `.products.products-grid` or `.products.products-list` selector (depends on current view mode). However, if your theme uses a custom selector, you should specify it here.

Ajax Infinite Scroll

The scroll module provides you with the ability to activate the infinite scroll for traversing your catalog. It works in 2 modes:

1. **Automatic Infinite Scroll** automatically loads the next page when the user scrolls down to the bottom of the current page.
2. **Load More Button** triggers the next page load by hitting the **Load More** button.

General Settings

Go to **Stores > Configuration > Mirasvit Extensions > Scroll** section.

- **Scroll Mode** - defines, the mode used for loading next pages:
 - **Disabled** - disable scroll functionality.
 - **Infinite scroll**
 - **Load More Button**
 - **Infinite scroll + Load More Button**
 - **Load More Button + Infinite scroll**
- **Load Previous Page Button Label** - if a user opens your site by a direct link which loads the specific category page (using param "p=page_num"), our module shows the **Load Previous Page** button on top of the catalog to give the user the ability to see the previous pages.
- **Load Next Page Button Label** - label for **Load More** button.

- **Pages limit for the first pagination mode type** - set the number of pages which will be loaded by the first pagination mode type. Available only for **Infinite scroll + Load More Button** and **Load More Button + Infinite scroll** scroll modes.
- **Product List Selector** - our extension uses this selector as the starting point for the initialization of the scroll functionality. The Default Magento block which wraps products has the `.products.products-grid` or `.products.products-list` selector (depends on current view mode). However, if your theme uses a custom selector, you should specify it here.

Configuring Grouped Options

This part of the Layered Navigation extension provides you with the ability to combine attribute options into one filter for layered navigation.

It is located on the **Content -> Layered Navigation -> Grouped Options** page.

General Information

Is Active Yes

Labels

Admin *

Default Store View

Group Code *

Position *

Swatch *

None

Attribute *

Select Attribute

Field	Description
Is Active	Enable/disable current Grouped Options.
Labels	Defines a label for Grouped Options for each store. If the label for a particular store has not been set, the admin area label will be used for that store.
Group Code	A key for current Grouped Options that will be used as a value of the attribute The code should be unique among all Grouped Options.
Position	The position of the filter in the navigation bar on the frontend.
Swatch	Choose the swatch type of the grouped option. There are 3 possible swatch types provided: - None; - Color; - Image; Swatch will be used for grouped options only if the original attribute options have them.
Color	Select the color for the current Grouped Options which will be displayed on the frontend. This field is visible only for the Color swatch type.
File	Upload the image that will be used on the frontend in the navigation bar. This field is only visible for Image swatch type.
Attribute	Select the attribute from the dropdown whose options you'd like to combine in one filter.
Options	Choose options from the selected attribute to combine in one filter. This field only visible after the attribute is selected.

Press the **Save** button to save Grouped Options.

Once Grouped Options is created and active, the options combined in it will be replaced in the navigation bar with one grouped option on each category page even if only one of the combined options is present there.

Product Attributes Navigation Options

Our extension uses **SEO Filters** to define possible filters. The extension adds additional options to product attributes that are used to build Layered Navigation.

To adjust your attributes for Navigation, visit **Stores -> Attributes -> Product** and select an attribute.

Basic Navigation Options

They are located in the **Storefront Properties** subsection and are added to all attributes:

- **Use in Layered Navigation** - defines how current attributes should be used in Layered Navigation. There are three possible options:
 - **Filterable (with Results)** - defines which filter can be used in Navigation, and which results can be displayed and manipulated.
 - **Filterable (no Results)** - defines that filter can be used in Navigation, but results can not be manipulated.
 - **No** - attribute can not be used for Navigation.
- **Use in Search Results Layered Navigation** - our extension features additional filters, which can be applied to and combined with already filtered results. If this option is set to **Yes**, then this attribute can be combined.

Note

This option applies only to enumerable properties, like **Dropdown**, **Multiple Select**, **Price**, and so on.

Overriding Filter Options Display and Behaviour

Our extension allows you to adjust filter options display and behavior per attribute.

This can be done by using a special tab added to such attributes, called **Layered Navigation**.

If the property is enumerable and has a defined set of values, the display of each value can be customized.

There are three sections in this tab with different settings:

- **Appearance**
 - **Display Mode** - defines how filter options are displayed in the layered navigation on the storefront. Applicable **only** for attributes of a type **price**
 - **Value Template** - specifies the template for price format. Applicable **only** for attributes of a type **price**
 - **Show Search Box** - defines whether to display the search box for the filter. **Not** applicable for attributes of a type **price**
 - **Tooltip** - the tooltip text for the filter.
- **Visibility**
 - **Categories Visibility Mode** - defines whether the filter should be displayed/hidden in particular categories
- **Additional**
 - **Enable Multiselect** - overrides the multiselect setting from the general configurations per attribute

- **Multiselect Logic** - defines the multiselect logic (OR/AND) per attribute. Applicable **only** for attributes of a type **select** and **multiselect**. The default behavior is OR.
- **Sort Options by** - defines the sorting order for attribute options in layered navigation. Applicable **only** for attributes of a type **select** and **multiselect**.
- **Use Alphabetical Index** - Allows you to use alphabetical index for category filter. More information about this feature is [below](#).

If the property is enumerable and has a defined set of values, the display of each value can be customized. For each possible value, there are four possible options:

Setting	Description
Option	name of possible value (read-only property).
Images	this is the image to be used instead of the widget, defined in the Display options setting in the General section.
Label	a label to be used instead of the default name, shown in the Option field.
Whole width image	defines whether the image should be displayed as is (selected) or shrunk to standard proportions (deselected).

By combining these definitions, you can completely override your filter display on the sidebar and create a more attractive appearance.

Alphabetical index

This feature provides you with the ability to filter attribute options by the first letter of their label. The alphabetical index will appear only if the number of options in the filter is equal or higher than the [limit for alphabetical index](#) configured in the extension.

If this option is enabled for a filter it will look like here:

CLIMATE

A C I M R S W

- All-Weather (8)
- Cold (4)
- Cool (17)
- Indoor (35)
- Mild (16)
- Rainy (2)
- Spring (21)
- Warm (28)
- Windy (8)

If for this attribute the **Sort Options by** is set to **Label (alphabetical)** the options of the attribute will be grouped by the first letter like here:

CLIMATE

A C I M R S W

A

All-Weather (8)

C

Cold (4)

Cool (17)

I

Indoor (35)

M

Mild (16)

R

Rain (2)

Manage Brand

This section describes how to create and edit brand pages.

To create a new brand page, go to the **Content -> Brands -> Brand Pages** section and press the button **Add Brand**. The brand page that will appear is divided into six sections:

General Information

Option	Description
Is Active	has the ability to enable / disable brand.
URL key	Defines URL for your brand page. If the field is empty, the value will be created automatically.
Brand	Choose the existing brand or create a new one by clicking the button Add New Brand . The brand attribute should be defined in the Stores -> Configuration -> Mirasvit Extensions -> Brand -> General -> Brand Attribute .
URL key	Defines URL for your brand page. If the field is empty, the value will be created automatically.
Logo	Defines image for the brand logo. The permitted file types: png, gif, jpg, jpeg, svg.
Title	Defines brand title. If the field is empty, the value will be created automatically from the Brand field.
Description	Defines brand description.
Visible in Store View	Defines where the brand page will be displayed.

[Back to Top](#)

Content

This section allows configuring the content of the brand page and defining how it should be displayed. The Content section has a main config block **Default (Admin)** and additional blocks for each Store View the brand page is configured to be displayed in. Each config block has the following fields:

Option	Description
Title	Defines brand title. If the field is empty, the value will be created automatically from the Brand field.
Description	Defines brand description.
Short Description	Defines a short description. It can be used in tooltip (STORES > Configuration > Brand > Brand Logo and Tooltip > Product List Brand Logo Tooltip).
Display mode	Defines how the brand page should be displayed. It has 3 options: Products only , Static block only , Static block and products . If not selected the Products only display mode will be used.
CMS block	Defines a static block to display at the top of the brand page. Blocks should be added in Content -> Elements -> Blocks . Not applicable for the Products only display mode.

Search Engine Optimization

Option	Description
Meta Title	Defines the meta title for the brand page.
Meta Keywords	Defines meta keywords for the brand page.
Meta Description	Defines the meta description for the brand page.
SEO Description	Defines the seo description for the brand page.
SEO Description Position	Defines the position of seo description for the brand page.
Canonical Url	Allows you to define the default cross-domain canonical URL.
Robots	This directive controls page visibility by search engines' crawlers. There are four available variants: NOINDEX , NOFOLLOW , NOINDEX, FOLLOW , INDEX, NOFOLLOW , INDEX FOLLOW .

[Back to Top](#)

Banner

Option	Description
Banner Alt	Defines alternative text for the banner image. If the field is empty, the value will be created automatically from the Brand field.
Banner Title	Defines banner title. If the field is empty, the value will be created automatically from the Brand field.
Banner Image	Defines banner image. The permitted file types: png, gif, jpg, jpeg.
Banner position	Defines where the banner will be displayed on the page. There are three available options: After title position , Before description position , After description position .

[Back to Top](#)

Banner slider

Option	Description
Show in Brand Slider	Defines whether banner will be displayed in the slider or not.
Slider Position	Defines the position of the brand in the slider. The allowed range is 0 - 99.

[Back to Top](#)

Products of this brand

The grid with products assigned to the current brand.

This section also provides you with the ability to quickly add products to the current brand by clicking the **Add products** button. After clicking the button **Add products** the aside block will be shown with the products. After selecting products click the **Add Selected Products** button and those products will be added to the

current brand.

[Back to Top](#)

HYVA customizations

This section describes additional manual customizations for HYVA-based theme templates in regards to achieving the full compatibility of all features provided by the Mirasvit Layered Navigation extension

Product Attribute Linking

In case you'd like to use the **Product Attribute Linking** feature in your HYVA theme you need to modify the template file `Magento_Catalog/templates/product/view/product-info.phtml` in your theme.

```
<div id="product-details">
  <?php foreach ($block->getAttributes() as $attributeConfig) {
    $attribute = $attributesViewModel->getAttributeFromLayoutConfig($attributeConfig); ?>
    <?php if ($value = $attribute['value'] ?? null) { ?>
      <div class="flex border-t border-gray-300 py-2 last:mb-6 last:border-b <?/* @noEscape */
                                                $attribute['value'] ?: "" ?>">
        <span class="w-1/2 text-left text-gray-700 product-detail-label">
          <?= $escaper->escapeHtml($attribute['label']) ?>
        </span>
        <span class="w-1/2 ml-2 text-left text-gray-900 product-detail-value">
          <?= $escaper->escapeHtml($value) ?>
        </span>
      </div>
    <?php } ?>
  <?php } ?>
</div>
```

In this template file find the `<div id="product-details">` element

Remove part `<?/* @noEscape */ $attribute['value'] ?: "" ?>`

Replace line `<?= $escaper->escapeHtml($value) ?>` with `<?= $value ?>`

```
<div id="product-details">
  <?php foreach ($block->getAttributes() as $attributeConfig) {
    $attribute = $attributesViewModel->getAttributeFromLayoutConfig($attributeConfig); ?>
    <?php if ($value = $attribute['value'] ?? null) { ?>
      <div class="flex border-t border-gray-300 py-2 last:mb-6 last:border-b">
        <span class="w-1/2 text-left text-gray-700 product-detail-label">
          <?= $escaper->escapeHtml($attribute['label']) ?>
        </span>
        <span class="w-1/2 ml-2 text-left text-gray-900 product-detail-value">
          <?= $value ?>
        </span>
      </div>
    <?php } ?>
  <?php } ?>
</div>
```

Note

Replacing `<?= $escaper->escapeHtml($value) ?>` with `<?= $escaper->escapeHtml($value, ['a']) ?>` is not recommended as `$escaper->escapeHtml()` will remove all attributes from the `<a>` tag except the `href` attribute.

Troubleshooting

This section describes the most common problems that customers report and how they can be resolved:

- [Filter is not visible on some category pages](#)
- [Price filter shows a single price range option](#)

The filter is not visible on some category pages, while it remains visible on others

Description

For example, you have discovered that the color filter is visible on some category pages and not visible on others.

Explanation

Should it occur that a specific category's filter consist of a single option and filtering by this option does not reduce this category's quantity of products (*not sure if message has changed*), then our module skips such filters because they serve no purpose.

Example

E.g., your category page contains 14 products. All of the products are white, so displaying a color filter with the single option "white" makes no sense because it does not narrow down the quantity of visible products.

The Price filter shows a single price range option

Solution

Magento allows you to configure the **price step** setting on the category and system levels.

Therefore, if the price filter shows a single range only for a specific category, navigate to that category settings in the **Catalog > Categories** section, open the tab **Display Settings**, and verify the field **Layered Navigation Price Step**.

If all categories display a single price range, then you should check the system level **price step** settings:

1. On the **Admin** sidebar, tap **Stores**. Then under **Settings**, choose **Configuration**.
2. In the panel on the left under **Catalog**, choose **Catalog**.
3. Expand the **Layered Navigation**. Now you can verify and adjust the price settings if needed.

Useful Info

For more information about price navigation, refer to the official Magento 2 [documentation](#).

How to upgrade extension

To upgrade the extension, take the following steps:

1. Back up your store's database and web directory.
2. Log in to the SSH console of your server and navigate to the root directory of the Magento 2 store.
3. Run the command below to update the current extension with all dependencies:

```
composer require mirasvit/module-seo-filter:* mirasvit/module-navigation
```

Note

If you have the Hyva, run:

```
composer require mirasvit/module-seo-filter:* mirasvit/module-navigation
```

Note

In some cases, the command above is not applicable, or you are unable to update just the current module, meaning you need to upgrade all Mirasvit modules in a bundle. In this case, the command above will have no effect.

Instead, run the `composer update mirasvit/*` command. It will update all Mirasvit modules which are installed in your store.

4. Run the below command to re-enable the extension:

```
php -f bin/magento module:enable Mirasvit_Core Mirasvit_SeoFilter Mirasvit_Navigation
```

Note

If you have the Hyva, run:

```
php -f bin/magento module:enable Mirasvit_Core Mirasvit_SeoFilter Mirasvit_Navigation
```

Note

If you are using Magento LiveSearch, additionally run:

```
php -f bin/magento module:enable Mirasvit_LayeredNavigationLiveSearch
```

5. Run the command below to install the updates:

```
php -f bin/magento setup:upgrade
```

6. Run the command below to clean the cache:

```
php -f bin/magento cache:clean
```

7. Deploy the static view files

```
rm -rf pub/static/*; rm -rf var/view_preprocessed/*;  
php -f bin/magento setup:static-content:deploy
```

Disabling the Extension

Temporarily Disable

To temporarily disable the extension, please take the following steps:

1. Log in to the SSH console of your server and navigate to the root directory of the Magento 2 store.
2. Run the command below to disable the extension:

```
php -f bin/magento module:disable Mirasvit_LayeredNavigation Mirasvit_S
```

Note

If you have the Hyva, run:

```
php -f bin/magento module:disable Mirasvit_LayeredNavigation Mirasvit_S
```

Note

If you are using Magento LiveSearch, additionally run:

```
php -f bin/magento module:disable Mirasvit_LayeredNavigationLiveSearch
```

3. Log in to the Magento backend and refresh the store cache (if enabled). Then deploy the static view files.

Extension Removal

To uninstall the extension, please take the following steps:

1. Log in to the SSH console of your server and navigate to the root directory of the Magento 2 store.
2. Run the command below to remove the extension:

```
composer remove mirasvit/module-navigation mirasvit/module-seo-filter
```

Note

If you have the Hyva, run:

```
composer remove mirasvit/module-navigation mirasvit/module-seo-filter r
```

3. Log in to the Magento backend and refresh the store cache (if enabled). Then deploy the static view files.

2.8.3

(2025-01-27)

Improvements

- Added the ability to set rel=nofollow to links with multiple filters applied
-

2.8.2

(2025-01-14)

Fixed

- Issue related to price-slider seo-friendly url
 - Added file uploader compatibility on magento 2.4.7
-

2.8.1

(2025-01-06)

Fixed

- Issue related to changing of product list mode in magento-2.4.7
-

2.8.0

(2024-12-27)

Improvements

- Refactoring of the settings menu
-

2.7.39

(2024-12-24)

Fixed

- Issue related to brand canonical link if "Brand Page URL" is set to "Long url"
-

2.7.38

(2024-12-23)

Fixed

- Product list mode could not be changed if "Remember Category Pagination" is enabled
-

2.7.37

(2024-12-17)

Fixed

- Added limit for filter combinations in quick navigation sequence
 - Horizontal filters are not shown if category "Anchor" is set to "No"
-

2.7.36

(2024-12-13)

Improvements

- Added ability to select attributes for product attribute linking feature

Fixed

- Issue related to horizontal filters in confirmation mode
-

2.7.35

(2024-12-05)

Fixed

- Issue related to Brand pages on magento 2.4.3
-

2.7.34

(2024-11-26)

Fixed

- Issue related to custom price filter alias
-

2.7.33

(2024-11-21)

Improvements

- Added possibility to sort filter options by product counts

Fixed

- Fixed the issue with filtering brand pages by ID in the Brand Pages grid
-

2.7.32

(2024-11-13)

Features

- Brands menu item modes - link and popup

Fixed

- The issue with incorrect URLs when switching store views (Brands)
-

2.7.31

(2024-11-04)

Improvements

- Removed the "m-brand-seo-compatibility" plugin
-

2.7.30

(2024-10-30)

Fixed

- Performance improvement of quicknavigation queries
 - Added compatibility with Amasty Seo module
 - Issue related to Brand page routing
-

2.7.29

(2024-10-22)

Fixed

- Issue related to alphabetical index with cyrillic symbols
 - Lipscore compatibility
-

2.7.28

(2024-10-02)

Fixed

- Added rel attributes to clear filter links
-

2.7.27

(2024-09-30)

Improvements

- Cleanup old sequences (used filter's combinations) by cron
- Added seo description field to brand page

Fixed

- Issue related to input checkbox
-

2.7.26

(2024-09-25)

Improvements

- Show option count if filter label is longer than sidebar width
- Added ability to precalculate filter options counts in `by_button_click` mode

Fixed

- Issue related to livesearch synchronization
-

2.7.25

(2024-09-19)

Fixed

- Issue related to Livesearch compatibility
-

2.7.24

(2024-09-19)

Fixed

- Livesearch compatibility
 - Scroll-bar duplication in infinite scroll mode
-

2.7.23

(2024-09-13)

Features

- Sticky Sidebar

Fixed

- Issue related to brand url suffix
 - Font-awesome loaders are replaced with svg
-

2.7.22

(2024-08-27)

Fixed

- Fixed backend validation for attributes with Input Validation for Store Owner set as Integer Number
 - Issue related to Brand stores display mode
-

2.7.21

(2024-08-05)

Fixed

- Issue related to horizontal filters
-

2.7.20

(2024-08-02)

Fixed

- Added possibility to hide unuseful additional filters
-

2.7.19

(2024-07-12)

Fixed

- Issue related to backend type of decimal filter
 - Issue related to stock status filter
-

Change Log

2.7.18

(2024-07-03)

Fixed

- Issue related to grouped options image
-

2.7.17

(2024-06-21)

Fixed

- Issue related to AddBrandLogoPlugin
-

2.7.16

(2024-06-20)

Improvements

- Added new pagination mode - load more button with default pagination
-

2.7.15

(2024-06-12)

Fixed

- Filter multiselect AND logic issue
-

2.7.14

(2024-06-12)

Fixed

- All products page was added to widget layout update list
-

2.7.13

(2024-05-29)

Improvements

- Added PageBuilder for Brand description field

Fixed

- Label render process optimization
-

2.7.12

(2024-05-21)

Fixed

- Issue related to price filter url with prefix
 - Breadcrumbs error on product page
-

2.7.11

(2024-04-23)
