

The settings of Advanced Reviews are located at **Stores ? Configuration ? Mirasvit Extensions ? Advanced Reviews** and are grouped into the following sections:

- [General Settings](#) - basic configuration of the extension;
- [Review Media](#) - attachments and gallery settings;
- [AI Features](#) - settings for AI-powered features;

Extended Settings

- **Enabled** - enable/disable reviews.
- **Allow Guests to Write Reviews** - enable/disable the ability to leave reviews for guests.
- **Default Sort by** - default sort order for reviews.
- **Display Pros/Cons** - enable/disable additional review fields - pros and cons.
- **Display Reviewer Location** - enable/disable location label from where the review was placed.
- **Display "Verified Buyer" Labels** - enable/disable "Verified Buyer" label for reviews placed after the product was ordered.
- **Display Purchased Product Info** - displays additional information of purchased product. This option only affects reviews for configurable products placed by verified buyers.
- **Order Statuses** - Select for which order statuses the customer should be considered as a "Verified Buyer". By default only the "complete" status is used. After changing this setting reindex reviews with the command `bin/magento mirasvit:review:reindex --verify --force`

Review Media

- **Enable attaching photos to reviews** - enable/disable the ability to attach photos to reviews.
- **Display review photos gallery** - enable/disable the media gallery for attached photos.
- **Maximum number of photos per review** - Max number of images to upload per review. The limit should be between 1 and 20 photos. If empty, the default limit will be used (5 photos).

AI Features

- **API Key** - Generate an [OpenAI API key](#). You'll need to create an account if you don't have one.
- **Enable review aggregation** - If enabled the extension will generate a summarized review for each products. The summarized review will be generated based on the last 10 customer reviews. The summarized review won't be generated for products with less than 5 reviews.
- **Add info hint to review summary title** - If enabled the extension will add info icon and popup with info that the summary was generated by AI.
- **Autowrite Review** - Enable/disable the ability to generate the content for a product review using Open AI (ChatGPT) when creating a new review from the admin panel.

General Configurations

All configurations of the **Comments** extension are located at **Stores -> Configuration -> Mirasvit Extensions -> Comments**.

The extension has only one configurations section - **General Settings** - with the following configurations:

- **Enable Comments** - enable/disable the comments feature.
- **Allow Guests to Write Comments** - defines whether guest users are allowed to leave comments or not.
- **Automatically Approve Comments** - defines whether comments left by visitors should automatically obtain the **Approved** status or should be left for moderation.
- **Date Format** - defines how the date when the comment was left should be displayed.
- **Enable Admin Notifications** - if enabled, the extension will add notifications about pending comments into the admin system notifications.

General Configurations

All configurations of the **Comments** extension are located at **Stores -> Configuration -> Mirasvit Extensions -> Comments**.

The extension has only one configurations section - **General Settings** - with the following configurations:

- **Enable Comments** - enable/disable the comments feature.
- **Allow Guests to Write Comments** - defines whether guest users are allowed to leave comments or not.
- **Automatically Approve Comments** - defines whether comments left by visitors should automatically obtain the **Approved** status or should be left for moderation.
- **Date Format** - defines how the date when the comment was left should be displayed.
- **Enable Admin Notifications** - if enabled, the extension will add notifications about pending comments into the admin system notifications.

Command Line Interface

Usage: `php -f bin/magento [command]`

- `mirasvit:mirasvit:review:aggregate [options]` - generate aggregated reviews (AI-powered). Allowed Options:
 - `--product [id]` - specify the ID of the product for which aggregated review should be generated. If omitted the extension will generate aggregated reviews for all reviewed products.
- `mirasvit:mirasvit:review:generate [options]` - generate reviews using Open AI. Allowed options:
 - `--nickname [nickname]` - the nickname of the reviewer. This option is required.
 - `--rating [rating]` - rating from 1 to 5. This option is required.
 - `--product [product_id]` - the ID of the product for which the review should be generated. If omitted the extension will generate reviews for all products.
 - `--store [store_id]` - specify for which store view the review should be generated
 - `--additional [text]` - add additional instructions for Open AI. These instructions will be included in the prompt for reviews generation.
 - `--qty [number]` - the limit of reviews to generate in one execution.
 - `--autoapprove` - define if generated reviews should be automatically marked as approved
- `mirasvit:review:reindex [options]` - reindex reviews locations and "verified buyer" data. If no options specified the extension will reindex both. Allowed options:
 - `--verify` - reindex "verified buyer" data.
 - `--location` - reindex reviewers' location data.
 - `--force` - force reindex. Affects only the "verified buyer" data reindex. Should be used after changing the Store Statuses setting of the extension.

How to upgrade extension

To upgrade the extension, follow these steps:

1. Backup your store's database and web directory.
2. Login to your server's SSH console and navigate to the root directory of the Magento 2 store.
3. Run the command below to update the current extension with all dependencies:

```
composer require mirasvit/module-review:* --update-with-dependencies
```

Note

In some cases, the command above is not applicable; neither is it possible to update just the current module, nor need to upgrade all the Mirasvit modules in a bundle. In this case, the command above will be of no effect.

Run instead `composer update mirasvit/*` command. It will update all the Mirasvit modules installed in your store.

4. Run the command below to enable the extension:

```
php -f bin/magento module:enable Mirasvit_Core Mirasvit_Review Mirasvit_...
```

5. Run the command below to install updates:

```
php -f bin/magento setup:upgrade
```

6. Run the command below to clean the cache:

```
php -f bin/magento cache:clean
```

7. Deploy static view files:

```
rm -rf pub/static/frontend/*; rm -rf pub/static/backend/*; rm -rf var/...  
php -f bin/magento setup:static-content:deploy
```

Disabling the Extension

Temporarily Disable

To temporarily disable the extension please follow the following steps:

1. Login to your server's SSH console and navigate to the root directory of the Magento 2 store.
2. Run the command below to disable the extension:

```
php -f bin/magento module:disable Mirasvit_Review Mirasvit_Comment
```

3. Log in to the Magento backend and refresh the store's cache (if enabled).

Removing the Extension

To uninstall the extension, please follow these steps:

1. Login to your server's SSH console and navigate to the root directory of the Magento 2 store.
2. Run the command below to remove the extension:

```
composer remove mirasvit/module-review
```

3. Log in to the Magento backend to refresh the store cache (if enabled).
