Shipping Table Rates Manual

Getting Started

Welcome to the **Shipping Table Rates** documentation. Whether you are a new or an advanced user, you can find some useful information here.

First of all, we recommend to check the following link:

- [How to install extension](#)

How to install the extension

1. Backup your store's database and web directory.
2. Login to the SSH console of your server and navigate to the root directory of the Magento 2 store.
3. Copy the installation instructions from the page [My Downloadable Products](#) to the SSH console and press ENTER.
4. Run command `php -f bin/magento module:enable Mirasvit_Core Mirasvit_ShippingTable Mirasvit_ShippingArea` to enable the extensions.
5. Run command `php -f bin/magento setup:upgrade` to install the extension.
6. Run command `php -f bin/magento cache:clean` to clean the cache.

7. Deploy static view files

   ```
   rm -rf pub/static/*; rm -rf var/view_preprocessed/*; php -f
   bin/magento setup:static-content:deploy
   ```

Methods

To create a new shipping method, go to **Stores > Shipping Table Rates > Methods**, and press the **Add New Method** button. Fill in all the required fields on the method edit page.

General information

- **Name** - The method name that is displayed on the frontend in the cart/checkout. Example: UPS/FedEx/etc.
- **Description** - the method description for internal usage in the admin panel.
- **Active** - enabled/disabled the method.
- **Store View** - select the store view where the method is available.
- **Customer Group** - select the Customer Groups for which the method is available.

Rates

To create a new rate, go to **Stores > Shipping Table Rates > Rates**, and press the **Add New Rate** button. Fill in all the required fields on the method edit page.

General Information

- **Active** - activates the Rate.
- **Priority** - the sort order of the Rate.
- **Stop further rates processing** - if enabled, no other Rate will be applied, if this one applies.
- **Method** - select the Shipping method the Rate is related to.
- **Type** - select the type of the address configuration. The Shipping Area and Shipping Address are available.
  - **Shipping Area** - created in the **Stores > Shipping Area** section. Only for internal usage. Fields:
  - **Internal Name** - the Area name.
  - **Active** - activates the Area.
  - **Applying Conditions** - select the condition you wish to use for the Area.
  - **Shipping Address** - configured in the next section of the Rate.
  - **Address Information:**
    - **Country** - select the country for which the rate is applied.
    - **State** - select the state(all the states or specified state) of the country for which the rate is applied.
    - **City** - select the city for which the rate is applied(can be empty).
    - **Zip** - the Zip code for which the rate is applied(can be empty).
    - **Zip From/Zip To** - allows selecting the Zip range to apply for which the rate is applied (can be empty).

Conditions

Select the condition you wish to use for the rates.

- **Conditions**
  - **Type**
  - **QTY from/QTY to** - the quantity of the items in the cart for which the rate should be applied. If the qty is different the rate is not applied for the purchase.
  - **Subtotal from/Subtotal to** - the cart Subtotal for which the rate should be applied. If the Subtotal is different the rate is not applied for the purchase.
  - **Weight from/Weight to** - the Weight in the purchase for which the rate should be applied. If the Weight is different the rate is not applied for the purchase.
  - **Min Order Amount** - the minimum order amount(exl. tax) the Rate should be applied to.
  - **Min Order Amount (Incl. tax)** - the minimum order amount (Incl. tax) the Rate should be applied to.

Rates and Thresholds

Select the options you wish to use for the rates.

- **Rates**

- **Fixed Rate per Order** - sets the rate per order defined in the "value" field.
    - **Fixed Rate per Product** - sets the rate per Product defined in the "value" field.
    - **Percentage Rate per Product** - sets the percentage rate per Product defined in the "value" field.
    - **Percentage Rate per Unit of Weight** - sets the rate per Unit of Weight defined in the "value" field.
  - **Thresholds**
    - **Minimum shoping rate** - sets the minimal value for thresholds.
    - **Maximum shoping rate** - sets the maximal value for thresholds.

How to import shipping rates

The Shipping Table Rates module offers functionality for importing already existing tables with shipping rates through a CSV file. Get acquainted with the format of this file by exporting shipping rates from your store or [module's demo](#).

In order to import shipping rates from the CSV file, you need to create methods according to store views and customer groups.

Upload the CSV file with shipping rates to your server into folder **var/import/table_rates.csv**. The file has to be named as **table_rates.csv**.

Navigate to the shipping rate page configuration by going through **Stores > Configuration > Shipping Table Rates** and pressing **Import** button.

ID	Method	Active	Priority	Shipping Address	Conditions	Rates
1	Best shipping method	Yes	1	SE 0	Weight From: .5 Weight To: .7	Fixed Ra Weight:
2	Best shipping method	Yes	1	US 0	-	Fixed Ra

How to upgrade extension

To upgrade the extension follow these steps:

1. Backup your store's database and web directory.
2. Login to the SSH console of your server and navigate to the root directory of the Magento 2 store.
3. Run command `composer require mirasvit/module-shipping-table:* --update-with-dependencies` to update current extension with all dependencies.

   Note

   In some cases the command above is not applicable, it's not possible to update just current module, or you just need to upgrade all Mirasvit modules in a bundle. In this case command above will have no effect.

   Run instead `composer update mirasvit/*` command. It will update all Mirasvit modules,

installed on your store.

4. Run command `php -f bin/magento setup:upgrade` to install updates.
5. Run command `php -f bin/magento cache:clean` to clean the cache.

6. Deploy static view files

   ```
   rm -rf pub/static/*; rm -rf var/view_preprocessed/*; php -f
   bin/magento setup:static-content:deploy
   ```

Disabling the Extension

Temporarily Disable

To temporarily disable the extension please follow these steps:

1. Login to the SSH console of your server and navigate to the root directory of the Magento 2 store.
2. Run command `php -f bin/magento module:disable Mirasvit_ShippingTable` to disable the extension.
3. Log in to the Magento backend and refresh the store cache (if enabled).

Removing the Extension

To uninstall the extension, please follow these steps:

1. Login to the SSH console of your server and navigate to the root directory of the Magento 2 store.
2. Run the command `composer remove mirasvit/module-shipping-table` to remove the extension.
3. Log in to the Magento backend and refresh the store cache (if enabled).
